

Each month's utility bill is dependent on which services you have, what size service you have, and that month's power and water consumption.

Below is a breakdown of the charges for single phase, residential electric service using 1,000 kWh and a 5/8" residential meter water/wastewater service using 1,000 gallons.

Electric (1,000 kWh)

Customer Charge	\$5.65	
O&M Energy Charge	\$45.06	} Base Energy Charge (\$76.45/1,000 kWh)
Base Fuel Charge	\$31.39	
Fuel Adjustment	\$22.68	

Total \$104.78

(Not including applicable City or Volusia County taxes)

Water/Wastewater (1,000 gallons)

Customer Charge - Water	\$11.65
Customer Charge - Wastewater	\$18.61
Water Consumption Charge	\$9.3
Wastewater Consumption Charge	\$4.07

Total \$30.31

RATES, CHARGES AND FEES

GENERAL SERVICE - DEMAND ELECTRIC RATE SCHEDULE

This schedule is applicable at any location within the Utilities Commission service area in accordance with Commission service policies, to non-residential customers with an annual measured peak demand of 50 kW up to 250 kW.

MONTHLY RATE:

Customer Charge	\$33.50
Demand Charge:	
All kW of billing demand per month @	\$ 6.75
Energy Charge:	
All kWh per month @	6.50¢ per kWh

Primary Service - When the customer owns and maintains all equipment, except metering, necessary to take service at primary voltage, the demand charge shall be reduced by \$0.35 per kW of Billing Demand.

The Billing Demand shall be the greater of: (1) the Measured Demand, for the current month, adjusted for power factor, if applicable, (2) fifty (50) kW, and (3) eighty (80) percent of the maximum Measured Demand, power factor adjusted, recorded during the preceding eleven (11) months.

The amount computed at the above monthly rate shall be adjusted plus or minus by an amount calculated in accordance with the formula specified in the Utilities Commission's Fuel and Purchased Power Cost Adjustment Clause which is a part of the "Monthly Rate" of this rate schedule.

The minimum charge is the Customer Charge plus the Demand Charge.

Electric service under this schedule is subject to the provisions of the Tax Adjustment Clause.

EFFECTIVE: June 1, 2006

UTILITIES COMMISSION, CITY OF NEW SMYRNA BEACH, FLORIDA

RATES, CHARGES AND FEES

GENERAL SERVICE - DEMAND TIME OF USE ELECTRIC RATE SCHEDULE

This schedule is available at any location within the Utilities Commission, City of New Smyrna Beach, Florida, service area in accordance with the policies of the Commission to non-residential customers with an annual measured peak demand of 50 kW or more. Each premise will be supplied at one point of delivery and all electric service will be supplied through one meter. Service under this schedule is limited to customers who are readily able to shift their capacity requirements from on-peak periods to off-peak periods and enter into an agreement with the Commission to do so.

MONTHLY RATE:

Customer Charge \$33.50

Demand Charge:

On Peak Period \$22.00 per kW of Excess Demand

Energy Charge:

All kWh per month 6.50¢ per kWh

Type of service shall be single or three-phase, 60 hertz, at one of the Commission's standard service voltages.

Primary Service - When the customer owns and maintains all equipment, except metering, necessary to take service at primary voltage, the Demand Charge shall be reduced by \$0.35 per kW of Billing Demand. If the service is metered at primary voltage, the measured demand and energy shall each be reduced by two percent (2%).

On Peak Period is the Eastern prevailing clock time between 7:00 a.m. and 11:00 p.m. on all days except Sundays and holidays designated by the National Electric Reliability Council.

Off Peak Period is all clock time not designated as On Peak Period.

EFFECTIVE: June 1, 2006

UTILITIES COMMISSION, CITY OF NEW SMYRNA BEACH, FLORIDA

RATES, CHARGES AND FEES

GENERAL SERVICE - DEMAND TIME OF USE
ELECTRIC RATE SCHEDULE (Cont.)

On Peak Demand shall be the greater of: (1) the maximum measured demand, fifteen (15) minute integrated, recorded during the On Peak Period for the billing month, and (2) eighty (80) percent of the maximum fifteen minute integrated demand recorded during the preceding eleven (11) months during the On Peak Period.

Excess Demand is the amount by which the maximum fifteen (15) minute integrated demand recorded during the On Peak Period for the billing month exceeds the Off Peak Demand.

Service under this schedule is subject to the provisions of the Fuel and Purchased Power Cost Adjustment Clause and the Tax Adjustment Clause.

EFFECTIVE: June 1, 2006

RATES, CHARGES AND FEES

GENERAL SERVICE LARGE DEMAND ELECTRIC RATE SCHEDULE

This schedule is available to any non-residential customer with an annual measured peak demand of 250 kW or more. Each premise will be supplied at one point of delivery and all electric service will be supplied through one meter.

Single or three phase, 60 hertz, at one of the Commission's standard service voltages.

MONTHLY RATE:

Customer Charge \$33.50

Demand Charge:

All kW of billing demand per month \$ 6.50 per kW

Energy Charge:

All kWh per month 6.00¢ per kWh

Primary Service - When the customer owns and maintains all equipment, except metering, necessary to take service at primary voltage, the demand charge shall be reduced by \$0.35 per kW of Billing Demand.

The Billing Demand shall be the greater of: (1) the Measured Demand, for the current month, adjusted for power factor, if applicable, (2) 250 kW, and (3) eighty (80) percent of the maximum Measured Demand, power factor adjusted, recorded during the preceding eleven (11) months.

The amount computed at the above monthly rate shall be adjusted plus or minus by an amount calculated in accordance with the formula specified in the Utilities Commission's Fuel and Purchased Power Cost Adjustment Clause which is a part of the "Monthly Rate" of this rate schedule.

RATES, CHARGES AND FEES

GENERAL SERVICE - NON-DEMAND ELECTRIC RATE SCHEDULE

This schedule is available at any location within the Utilities Commission service area in accordance with Commission service policies to non-residential customers with an annual measured peak demand of less than 50 kW.

MONTHLY RATE:

Customer Charge:

Single Phase Service	\$6.05
Three Phase Service	\$8.85

Energy Charge:

All kWh per month @	7.450¢ per kWh
---------------------------	----------------

The amount computed at the above monthly rate shall be adjusted plus or minus by an amount calculated in accordance with the formula specified in the Utilities Commission's Fuel and Purchased Power Cost Adjustment Clause which is a part of the "Monthly Rate" of this rate schedule.

The minimum charge is the Customer Charge.

Electric service under this schedule is subject to the provisions of the Tax Adjustment Clause.

**GENERAL SERVICE - NON-DEMAND LOAD MANAGEMENT
SERVICE ELECTRIC RATE SCHEDULE**

This schedule is available to customers meeting the application requirements for General Service Non-Demand service. The Load Management Credit under this schedule is applicable to General Service Non-Demand customers using an electric heat pump as the only source of electric heating and cooling.

Load Management Monthly Credit Amount:

<u>Interruptible Equipment</u>	<u>Monthly Credit</u>
Electric Heat Pump	\$5.00

The Commission may interrupt electric service to the above equipment, during the Peak Period, with a frequency and duration designed to minimize both the system demand and any inconvenience to load management customers. The current interruption policy, subject to change, may be obtained from the Commission.

For the months of November through April, the Peak Period is the prevailing clock time between 6:00 A.M. and 11:00 A.M. and 6:00 P.M. and 11:00 P.M.

For the months of May through October, the Peak Period is the prevailing clock time between 12:00 noon and 11:00 P.M.

EFFECTIVE: October 1, 1990

UTILITIES COMMISSION, CITY OF NEW SMYRNA BEACH, FLORIDA

RATES, CHARGES AND FEES

RESIDENTIAL SERVICE ELECTRIC RATE SCHEDULE

This schedule is available at any location within the Utilities Commission service area in accordance with the service policies of the Commission.

MONTHLY RATE:

Customer Charge

Single Phase Service \$5.65

Three Phase Service \$7.85

Energy Charge

All kWh per month @ 7.645¢ per kWh

The amount computed at the above monthly rate shall be adjusted plus or minus by an amount calculated in accordance with the formula specified in the Utilities Commission's Fuel and Purchased Power Cost Adjustment Clause which is a part of the "Monthly Rate" of this rate schedule.

The minimum charge is the Customer Charge.

Electric service under this schedule is subject to the provisions of the Tax Adjustment Clause.

EFFECTIVE: June 1, 2006

UTILITIES COMMISSION, CITY OF NEW SMYRNA BEACH, FLORIDA

RATES, CHARGES AND FEES

RESIDENTIAL LOAD MANAGEMENT SERVICE
ELECTRIC RATE SCHEDULE

This schedule is available to customers meeting the application requirements for Residential Service. Load Management credits under this schedule are applicable to residential customers using any combination of the following equipment.

Load Management Monthly Credit Amounts:

<u>Interruptible Equipment</u>	<u>Maximum Monthly Credit (500 kWh)</u>	<u>Monthly Credit (Below 500 kWh)</u>
Water Heater	\$3.00	\$.006 x kWh
Central Heating System	\$2.25	\$.0045 x kWh
Central Cooling System	\$2.25	\$.0045 x kWh

The Maximum Monthly Load Management Credit is based on electric consumption of 500 kWh. For any month in which the consumption falls below this level, the Load Management Credit will be adjusted according to the above formulas.

The Commission may interrupt electric service to the above equipment, during the Peak Period, with a frequency and duration designed to minimize both the system peak demand and any inconvenience to load management customers. The current interruption policy, subject to change, may be obtained from the Commission.

For the months of November through April, the Peak Period is the prevailing clock time between 6:00 A.M. and 11:00 A.M. and 6:00 P.M. and 11:00 P.M.

For the months of May through October, the Peak Period is the prevailing clock time between 12:00 noon and 11:00 P.M.

EFFECTIVE: October 1, 1996

UTILITIES COMMISSION, CITY OF NEW SMYRNA BEACH, FLORIDA

RATES, CHARGES AND FEES

TEMPORARY SERVICE ELECTRIC RATE SCHEDULE

This schedule is applicable to all electric service required for a short-term period to installations such as construction projects, fairs, displays, exhibits and similar temporary purposes.

MONTHLY RATE:

Temporary service shall be billed under the "Monthly Rate" provisions of the appropriate general service-non-demand or general service-demand rate schedule.

The customer shall pay, in advance, the estimated cost of installing and removing such facilities as may be required to provide such temporary service.

EFFECTIVE: October 1, 1983

UTILITIES COMMISSION, CITY OF NEW SMYRNA BEACH, FLORIDA

RATES, CHARGES AND FEES

CHARGES FOR TEMPORARY ELECTRIC SERVICE INSTALLATION

Temporary electric service connection charges shall be as follows:

- a. Installing and removing overhead service and meter \$100.00
- b. Connecting and disconnecting customer to direct buried underground facilities including installation and removal of meter \$ 60.00

The charges shall pertain only to single phase, 60 Hertz, at the available standard secondary distribution voltage. This service is available only when the Commission has existing capacity, lines, transformers and other equipment at the requested point of delivery. The Customer's service entrance electrical cable shall not exceed 200 amperes capacity.

The temporary electric service connection charges shall be nonrefundable and must be paid in advance of installation of such facilities. The cut-in charge is a separate charge payable by the customer and is not a part of the temporary electric service connection charges.

The Commission will charge and collect for temporary electric energy based on the temporary service electric rates schedule in effect at the time.

If specific temporary electric service other than that stated above is required, the Commission, at the Customer's request, will provide such additional electrical equipment. This estimated cost will be a Contribution-in-Aid-of-Construction payable in advance to the Commission.

EFFECTIVE: October 1, 1984

UTILITIES COMMISSION, CITY OF NEW SMYRNA BEACH, FLORIDA

RATES, CHARGES AND FEES

RESIDENTIAL UNDERGROUND SERVICE LATERALS

UNDERGROUND SERVICE LATERAL:

The entire length of underground service conductors between the distribution source, including any risers at a pole or other structure or from transformers, from which only one point of service will result, and the first point of connection to the service entrance conductors in a terminal or meter box outside the building wall.

UTILITIES COMMISSION:

The Utilities Commission will own and maintain service laterals up to the designated point of delivery except as otherwise noted. The Utilities Commission will install one underground service lateral to all newly constructed residential buildings containing less than five separate dwelling units. All units in one building must be gang metered at a single designated location.

CUSTOMER:

The customer shall furnish and install conduit as specified by the Utilities Commission. This includes excavating trench and backfill. The customer shall pay the Utilities Commission the differential cost between an overhead service and an underground service lateral as follows:

Three Phase Service:	\$300.00*
Single Phase Service:	\$275.00*

*These costs are for the average base electric service of 2/0 URD and 50' service lateral installed. Additional costs will be added and specific costs estimates provided for larger electric services, additional lengths of lateral, and if the work is performed at the request of the customer on a Saturday or Sunday/Holiday.

The relocation and/or upgrading of existing overhead and underground residential service laterals shall be the same as specified above plus all costs for labor, equipment, and material.

Existing direct buried service laterals that fail will be temporarily repaired until customer installs conduit, same requirements as specified above. Once conduit is installed a new service will be installed at no cost to customer.

EFFECTIVE: August 1, 2009

UTILITIES COMMISSION, CITY OF NEW SMYRNA BEACH, FLORIDA

RATES, CHARGES AND FEES

UNDERGROUND ELECTRIC PRIMARY DISTRIBUTION

DEFINITIONS:

- A. Residential Subdivisions: a tract of land which is divided into five or more building lots, and which is zoned residential.
- B. Single Family Detached Unit: a house designed and built to accommodate one family. The unit shall be free standing, not attached to any other dwelling unit.
- C. Multi-Family Residential Building: a structure in which two (2) or more dwelling units are attached by a common wall and/or roof.

APPLICATION:

- A. Single Family Detached Unit: Underground primary distribution facilities will not be provided unless those units are a part of a residential subdivision.
- B. Multi-Family Residential Building: will have underground primary distribution facilities provided so long as:
 - 1. The Utilities Commission is free to construct such extensions in the most economical manner.
 - 2. Reasonably full use is made of the tract plan upon which the building will be constructed.
 - 3. The applicant provides the necessary conduit furnished and installed, at his expense, as specified by the Utilities Commission.
 - 4. If any feeder circuit mains are deemed necessary by the Utilities Commission to provide and/or maintain adequate service within the development or buildings, and if the feeder mains are required to be underground, the underground feeder mains shall be installed by the Utilities Commission at no additional cost to the applicant.

EFFECTIVE: February 18, 1987

RATES, CHARGES AND FEES

UNDERGROUND ELECTRIC PRIMARY DISTRIBUTION (Cont.)

- C. Residential Subdivisions and Commercial Customers: Underground primary distribution facilities will be provided to residential subdivisions and commercial customers when requested by the applicant subject to the following conditions:
1. That at their expense, furnish and install conduit as specified by the Utilities Commission. This includes excavating, trench and backfill.
 2. If any feeder circuit mains are deemed necessary by the Utilities Commission to provide and/or maintain adequate service within the development or buildings, and if the feeder mains shall be installed by the Utilities Commission at no additional charge to the applicant.
- D. Other: All other units or buildings not explicitly covered by any of the above, apply for installation of underground primary distribution facilities; however, any differential cost between above ground (overhead) primary distribution construction and underground primary distribution construction will be borne completely by the applicant.

EFFECTIVE: February 18, 1987

UTILITIES COMMISSION, CITY OF NEW SMYRNA BEACH, FLORIDA

RATES, CHARGES AND FEES

ELECTRIC POLE LINE EXTENSIONS OR ADDITIONS

ELECTRIC POLE LINE EXTENSIONS:

Is the construction of an above ground (overhead) primary distribution facility, which adds to the Utilities Commission's existing facilities.

APPLICATIONS:

Upon acceptance of the application for service in the Utilities Commission service territory, the Utilities Commission will proceed to do such work and to provide and install such equipment as may be necessary in order to render service. This may include the extension of an existing line when necessary. In general, where the major portion of an anticipated extension will be built on public right-of-ways, and the new customer can reasonably be characterized as permanent, then the Utilities Commission will do all necessary construction at no cost to the customer. Where these guidelines clearly do not apply, the Utilities Commission may charge the customer all costs in excess of 2-1/2 times the estimated annual non-fuel revenue (exclusive of the costs for transformers, secondary connections, and meters), and/or such other charges as the particular circumstance may dictate. When kW demand factors, intermittent usage patterns, or premature investment result in necessarily inefficient utilization of the Utilities Commission's facilities, the Utilities Commission may require cash advances, minimum guarantees, or other means of providing a fair return on investment.

The terms and charges will be determined by the Utilities Commission staff based on the above conditions.

EFFECTIVE: November 1, 2006

UTILITIES COMMISSION, CITY OF NEW SMYRNA BEACH, FLORIDA

RATES, CHARGES AND FEES

**PUBLIC STREET LIGHTING AND PRIVATE OUTDOOR LIGHTING ELECTRIC
SERVICE RATE SCHEDULE**

This schedule is available throughout the entire territory served by the Utilities Commission, City of New Smyrna Beach, Florida.

Character of Service

Service includes installation, lamp replacement, maintenance and removal. The Utilities Commission will maintain its facilities during regular working hours, but does not guarantee continuous lighting and will not be liable for damages for any interruption, deficiency or failure of service, and reserves the right to interrupt service at any time for necessary repair to lines and equipment or system protection. The Utilities Commission shall be permitted to enter the customer's property at all reasonable times for the purpose of inspecting, maintaining, and installing and removing any or all of its equipment and facilities. The Utilities Commission will not be liable for damages occurring during installation, maintenance, or removal. The customer will be responsible for tree trimming and removing other vegetation that obstructs Utilities Commission vehicles and personnel. Willful damage to any Utilities Commission owned facilities by the customer will require full restitution by the customer.

Type of Installation

Street lights will normally be installed on Utilities Commission existing distribution system poles and fed from existing wires. The installation of any new distribution facilities and/or alterations to existing facilities to serve new street lights will require a Contribution-in-Aid-of-Construction (CIAC) paid in advance.

Street lights installed in existing or planned underground distribution areas will require customer trenching and conduit installation according to Utilities Commission drawings and specifications. The customer will also install Utilities Commission supplied equipment necessary to complete the conduit system. The Utilities Commission will install the electrical system, street light poles and fixtures. A Contribution-in-Aid-of-Construction (CIAC) paid in advance will be required.

Customer Contributions

Contribution-in-Aid-of-Construction (CIAC) - The installation cost of any new distribution system and/or alterations to existing facilities to serve street lights will require a CIAC equal to the total Utilities Commission cost paid in advance.

EFFECTIVE: February 1, 2011

Fuel and Purchased Power Cost Adjustment Clause

The amount computed at the above monthly rate shall be adjusted plus or minus by an amount calculated in accordance with the formula specified in the Utilities Commission's Fuel and Purchased Power Cost Adjustment Clause which is a part of the "Monthly Rate" of this rate schedule. The Monthly Fuel and Purchased Power Cost Adjustment charges, if any, will be determined as follows:

Daily kWh usage x days in billing period x monthly energy cost
adjustment factor (expressed dollars per kWh)

Tax Adjustment Clause

Electric service under this schedule is subject to the provisions of the Tax Adjustment Clause.

Terms of Payment

The terms of payment shall be in accordance with the provisions set forth on Sheet No. 4.0.

EFFECTIVE: February 1, 2011

RATES, CHARGES AND FEES

FUEL AND PURCHASED POWER COST ADJUSTMENT CLAUSE

Application:

This fuel and purchased power cost adjustment clause is applicable to and becomes a part of all the Utilities Commission's retail rate schedules and is applicable to all sales thereunder.

Billing:

The monthly bill computed under the appropriate retail rate schedule will be increased or decreased by an amount equal to the result of multiplying the kWh used by the fuel and purchased power cost adjustment factor (FPPCAC) determined as follows:

$$FPPCAC = \left(\frac{Fm}{Sm} - 0.03139 \right) \times \frac{1}{1-L} \times \frac{1}{1-T}$$

Where:

1. FPPCAC = Adjustment factor in dollars per kWh rounded to the nearest one thousandth of a cent applicable to bills rendered during the current fiscal billing cycle defined as October through September.
2. Fm = Total applicable fuel and net interchange energy costs.

Total Applicable Fuel Cost is:

- (a) Fossil and nuclear fuel consumed in the Utilities Commission's generating units and the Utilities Commission's share of fossil and nuclear fuel consumed in jointly owned generating units, plus the annual amortization requirement associated with the disposal of spent nuclear fuel as estimated for the current billing cycle; plus,
- (b) The net cost of purchases for scheduled maintenance, and the net energy and transmission costs of energy purchases when such energy is purchased on an economic dispatch basis to substitute for the Utilities Commission's own higher cost of energy estimated for the current billing cycle; plus,

EFFECTIVE: October 1, 1998

UTILITIES COMMISSION, CITY OF NEW SMYRNA BEACH, FLORIDA

RATES, CHARGES AND FEES

FUEL AND PURCHASED POWER COST ADJUSTMENT CLAUSE (Cont.)

- (c) The fossil and nuclear power costs associated with purchases for reasons other than identified in (b) above, including the purchase of capacity and energy owned through participation in joint agency projects and firm interchange service, and any associated transmission costs estimated for the current billing cycle; plus

Any one-time, non-recurring expenditures incurred by the Utilities Commission for the purpose of obtaining cost reductions on energy or capacity; minus

- (e) The energy costs of fossil and nuclear fueled generation recovered through the inter-system sales including the fuel costs related to the economy energy sales and other energy sold on an economic dispatch basis estimated for the current billing cycle; plus

- (f) An amount to correct for the over-recovery or under-recovery of the actual applicable fuel costs as defined in (a), (b), (c), (d) and (e) above, during the latest fiscal year, determined as the difference between actual applicable fuel costs and the costs actually billed during the same period; plus any previous over-recovery or under-recovery of actual applicable fuel costs as defined above associated with prior period adjustments, if any; minus

- (g) At the sole discretion of the Utilities Commission, the amount of any refunds associated with fuel and purchased power expenses as defined in (a) through (c) above, net of litigation expenses and other related costs, if any.

3. S_m = kWh estimated corresponding to the current 12-month billing cycle and is equal to the estimated sum of net generation, purchases, and interchange in, less inter-system sales.

4. L = System losses to be adjusted at the beginning of each fiscal year, based on the actual prior 12 month losses ending August 31.

5. T = Mandatory payment to the City of New Smyrna Beach, Florida, equal to 0.06.

TIME SHARING OWNERSHIP UNITS

To provide for the application of residential rates for energy used in time sharing ownership condominium units.

LIMITATIONS OF SERVICE:

The customer must demonstrate to the Utilities Commission compliance with the following criteria:

- (a) 100% of the energy is used exclusively for the co-owner's benefit;
- (b) None of the energy is used in any endeavor which sells or rents a commodity or provides a service for a fee;
- (c) Each point of service is separately metered and billed;
- (d) A responsible legal entity is established as the customer to whom the Utilities Commission can render its bills, and receive payment for said service.

EFFECTIVE: July 21, 1982

UTILITIES COMMISSION, CITY OF NEW SMYRNA BEACH, FLORIDA

RATES, CHARGES AND FEES

COMMON USE FACILITIES

To provide for the application of residential rates for energy used in commonly owned facilities of condominiums, cooperatives, and homeowners' associations.

LIMITATIONS OF SERVICE:

The customer must demonstrate to the Utilities Commission compliance with the following criteria:

A. Condominiums and Cooperatives:

1. 100% of the energy is used exclusively for the co-owner's benefit;
2. None of the energy is used in any endeavor which sells or rents a commodity or provides a service for a fee;
3. Each point of service is separately metered and billed;
4. A responsible legal entity is established as the customer to whom the Utilities Commission can render its bills, and receive payment for said service.

B. Homeowner's Associations:

1. 100% of the energy is used exclusively for the member homeowner's benefit;
2. None of the energy is used in any endeavor which sells or rents a commodity or provides a service for a fee;
3. Each point of service is separately metered and billed;
4. A responsible legal entity is established as the customer to whom the Utilities Commission can render its bills, and receive payment for said service;

EFFECTIVE: October 1, 1982

UTILITIES COMMISSION, CITY OF NEW SMYRNA BEACH, FLORIDA

COMMON USE FACILITIES (Cont.)

5. Membership in the homeowners' association which controls and operates the common facilities is required as a condition of the property ownership in the subdivision; and such requirement arises from restrictions of record which are set out or incorporated by reference on each member homeowner's deed;
6. Such restrictions require each member homeowner to pay his proportionate share of the costs of operating and maintaining the common facilities. This obligation to pay must be enforceable by placement of a lien on the member homeowner's property and by foreclosure for non-payment of such liens;
7. The homeowners' associations are comprised of persons owning contiguous lots in a planned development, and the commonly owned facilities are located within the development.

**LOW LEVEL MULTI-COLORED DECORATIVE LIGHTS
INSTALLATION AND REMOVAL ELECTRIC RATE SCHEDULE**

This schedule is available to any customer requiring short-term use such as fairs, displays, exhibits, holiday decorations and similar purposes.

Installation and Removal Charges:

Low Level Multi-Colored Decorative Lights installation and removal, minimum charge, and pole installation and removal (when required) shall be as follows:

- A. Installation and Removal \$.50/foot
- B. Minimum Installation and Removal Charge \$175.00
- C. Installation and Removal of 30 Foot Pole (if required). . . \$160.00/pole

Daily Rate:

Low Level Multi-Colored Decorative Lights Daily Energy Charge shall be as follows:

<u>Nominal Wattage</u>	<u>Bulbs/Foot</u>	<u>Average Daily kWh Usage/Ft. – Hr.</u>	<u>Rate 4/Ft. – Hr.</u>
10 Watts/Bulb	0.4	0.00414	0.021046

Energy Cost Adjustment:

If an energy cost adjustment exists, the amount computed under the Daily Rate shall be adjusted by plus or minus an amount determined as follows:

$$(\text{Average Daily kWh/Ft.-Hr.}) \times (\text{Number Feet}) \times (\text{Number of Hours in Billing Period}) \times (\text{Energy Cost Adjustment Factor [expressed in dollars per kWh]})$$

GREEN PRICING RATE SCHEDULE

This schedule is available at any location within the Utilities Commission, City of New Smyrna Beach, service area in accordance with the service policies of the Utilities Commission.

Customers may make voluntary contributions to be allocated to the Utilities Commission Green Pricing/Renewable Energy Program for common installations of Photovoltaic Energy production systems.

MONTHLY RATE:

RESIDENTIAL:

- (GP-1) Green Pricing Level 1 10 kWh/Month = \$2.00
- (GP-2) Green Pricing Level 2 25 kWh/Month = \$5.00
- (GP-3) Green Pricing Level 3 50 kWh/Month = \$10.00

COMMERCIAL:

- (GP-3) Green Pricing Level 3 50 kWh/Month = \$10.00
- (GP-4) Green Pricing Level 4 75 kWh/Month = \$15.00
- (GP-5) Green Pricing Level 5 100 kWh/Month = \$20.00

This rate is subject to the provisions of the Tax Adjustment Clause.

**CONVERSION OF ELECTRIC DISTRIBUTION SYSTEMS
FROM OVERHEAD TO UNDERGROUND RATE SCHEDULE**

*****THIS RATE WAS SUSPENDED ON MARCH 20, 2006--AGENDA ITEM 8-c*****

Application:

This schedule is available to residential subdivision and commercial customers within the electric service area of the Utilities Commission, City of New Smyrna Beach, that have 100% participation.

Definitions:

Residential Subdivisions: a tract of land which is divided into five or more building lots, and which is zoned residential.

Commercial Customer (non-residential): Service to customers engaged in selling, warehousing or distributing a commodity, in a service activity or profession, or in some form of economically-gainful or social activity (offices, stores, clubs, hotels, schools, etc.).

Contribution in Aid of Construction:

Contribution in aid of construction to be paid by the applicant shall be 85% of the cost of the conversion for customers within the Utilities Commission's service area. The Utilities Commission shall pay 15% of the cost of the conversion. The Utilities Commission will also coordinate with other government bodies for additional funding.

Application for Underground Conversion:

Application shall be made in writing to the Utilities Commission's Engineering Department. Applications shall have attached signatures from a minimum of 25% of the customers within the area requesting undergrounding. The Utilities Commission's Engineering Department will then prepare a preliminary engineering estimate for this applicant.

Applicant shall then forward to the Utilities Commission an application with 75% of customers' signatures. The Utilities Commission's Engineering Department will then perform a binding, detailed engineering estimate for the applicant. Said estimate will be binding for six months.

EFFECTIVE: April 10, 2002

UTILITIES COMMISSION, CITY OF NEW SMYRNA BEACH, FLORIDA

RATES, CHARGES AND FEES

CONVERSION OF ELECTRIC DISTRIBUTION SYSTEMS
FROM OVERHEAD TO UNDERGROUND RATE SCHEDULE (Cont.)

*****THIS RATE WAS SUSPENDED ON MARCH 20, 2006--AGENDA ITEM 8-c*****

Application for Underground Conversion: (Cont.)

Upon 100% participation, the applicant shall then furnish a promissory note for payment from each participant. The participants may elect to pay contribution in aid of construction as a one-time payment or finance through the Utilities Commission at an annual interest rate of 2% above prime, to be billed through the utility bill for a period of no more than 4 years. The interest rate shall be set at the onset of the loan and will continue throughout the duration of the loan.

Electric Facilities:

Electric facilities to be placed underground shall consist of primary, transformers, and service from the transformer to the customer's meter box. Customer is responsible for meter box.

Joint Use Poles:

The Utilities Commission will facilitate the removal of services from other providers but is not responsible for the cost of said removal.

Overhead Facilities:

The Utilities Commission will remove overhead facilities, including the pole, after joint pole users have removed their facilities.

Street Lights:

The Utilities Commission will remove existing street lights.

Installation of new street lights and private outdoor lighting will be in accordance with the public street lighting and private outdoor lighting electric service rate schedule.

Terms of Payment:

The terms of payment shall be in accordance with the provisions set forth on Sheet No. 4.0.

EFFECTIVE: April 10, 2002

UTILITIES COMMISSION, CITY OF NEW SMYRNA BEACH, FLORIDA

RATES, CHARGES AND FEES

FINANCING AIR CONDITIONER UPGRADES RATE SCHEDULE

*****THIS RATE WAS SUSPENDED ON OCTOBER 20, 2008--AGENDA ITEM 2-f*****

This schedule is available to an individual, residential customer who is a vested owner of the property where the air conditioning system is installed, although it is not required to reside on the property. The applicant must presently have an active, connected electric service account with the Utilities Commission, City of New Smyrna Beach. Loans will not be made to tenants renting or leasing the property.

Application:

Application shall be made in writing to the Utilities Commission's Engineering Department. A customer is eligible if replacing an existing air conditioning system with a new, energy efficient air conditioning system which has a minimum efficiency SEER rating of 12 or higher. The equipment must be new and meet the program requirements.

Upon the Utilities Commission's approval, the loan commitment will be valid for 60 days. Within this 60 day period, the air conditioning system must be installed and proof of equipment installation provided to the Utilities Commission's Engineering Department. The Utilities Commission reserves the right to conduct an on-site verification of the equipment purchased and installed.

Financing:

Customers eligible for financing through the U.C. will be billed monthly at an annual interest rate of 2% above prime, to be billed through the electric bill, for a period of no more than 4 years, and shall be secured by a promissory note and/or mortgage.

A non-refundable administrative fee of \$50.00 must be paid at the time of application, for services required to administer the records and financing process.

The Utilities Commission will not finance previously installed products or products paid for by the customer or financed through another lender.

The customer must execute an agreement which states the utilities will be terminated if the customer is in default of payments. All payments previously made are non-refundable.

The outstanding principal and interest shall be due in full upon transfer of ownership of the property.

EFFECTIVE: November 13, 2002

RATES, CHARGES AND FEES

RESIDENTIAL WIRING AND SURGE PROTECTION RATE SCHEDULE

*****THIS RATE WAS SUSPENDED ON JUNE 19, 2006--AGENDA ITEM 2-n*****

The Utilities Commission is offering a residential wiring maintenance and surge protection program to its customers through an agreement by and between the Commission and Progress Energy Florida, Inc., and in accordance with applicable policies of the Commission and Progress Energy.

This schedule is available to an individual, residential customer of the Utilities Commission who is a vested owner of the property where the following services are performed and/or installed. The customer must presently have an active, connected electric service account with the Utilities Commission, City of New Smyrna Beach. This program is not available to tenants renting or leasing the property.

HomeWIRE (Wire Maintenance Service):

HomeWIRE Monthly Fee	\$ 3.95 (Not Subject to Tax)
Reinstatement Fee	\$150.00 (If customer cancels program and Requests to be Reinstated)

Surge Protection:

Meter Base Arrestor Rental Monthly	\$ 5.95 (Plus Tax)
Installation - Includes Grounding	\$ 44.95 (Plus Tax)
Inspection and Grounding Repair If Needed	
Early Removal Fee for Meter Base Arrestor	\$ 60.00 (If Cancelled Within 24 Months of Installation, Plus Tax)
Plug-In Suppressors	\$49.00 to \$99.00 (Plus Tax, Price Depends on Suppressor Selection by Customer)
3-Phase Main Panel Arrestor Rental Monthly	\$ 9.95 (Plus Tax)
Installation of 3-Phase Main Panel Arrestor	\$150.00 (Plus Tax)
Early Removal Fee for Meter Base Arrestor	\$ 60.00 (If Cancelled Within 24 Months of Installation, Plus Tax)

Terms of Payment:

The terms of payment shall be in accordance with the payment policies of the Utilities Commission.

***Existing customers as of 6/19/06 may continue service through Progress Energy directly with a credit card option.

EFFECTIVE: October 1, 2003

**(Standby Electric and On-Site Generation) SE/OSG
INTERIM NET METERING RIDER TO
UC RESIDENTIAL AND GENERAL SERVICE SCHEDULES
EXCLUDING ALL LOAD MANAGEMENT SCHEDULES**

I. AVAILABILITY:

Throughout the Utilities Commission, City of New Smyrna Beach, Florida (UC), service area from existing lines of adequate capacity. Service under this Rider is provided on a customer by customer basis and subject to the completion of arrangements necessary for implementation.

This Rider may be modified or withdrawn and is classified by the Utilities Commission as a Non-Firm Electric On-Site Customer-Owned Generation Service Net Metering Rider to existing UC Residential and General Service Schedules excluding all Load Management schedules which Schedules may be amended from time to time. For purposes of affording electric supply options to native load customers, the participating customers agree that the Terms and Conditions Provisions or any other Commission determination regarding this Rider shall not be construed: as an obligation to serve; incur direct or imputed liability for persons, business processes, or tangible or intangible assets; or incur direct or indirect costs upon the UC system for having offered said Rider to participating customers.

The UC shall have the and reserves the right to reject any project from this Rider Classification upon any appropriate grounds, including, without limitation, a demonstration that the customer has installed OSG with a total nameplate rating greater than ninety percent (90%) of its demand; or has operated or may operate the SE/OSG in a material manner detrimental to the operation of the UC's electrical system; or has or may establish events whereby the UC is non-compliant with UC Res. 28-78 and NSB Charter.

A. Renewable Customer-owned Energy Power Producing Facilities

For retail customers with renewable energy generating systems* delivering kilowatt hours onto the UC system consisting of:

EFFECTIVE: November 1, 2013

RATES, CHARGES AND FEES

(Standby Electric and On-Site Generation) SE/OSG (Cont.)

**INTERIM NET METERING RIDER TO UC RESIDENTIAL AND GENERAL
SERVICE SCHEDULES**

EXCLUDING ALL LOAD MANAGEMENT SCHEDULES

1. Tier One. Ten (10) kilowatts or less provided they comply with the then in effect UC Standardized Interconnection Requirements and do not exceed ninety (90) percent of the customer's maximum potential alternating current demand served by all sources. UC fees for such installations will be consistent with fees for other customers without such generation, including application fees. However, compensation for energy delivered onto the UC system shall exclude the Charter required six (6) percent payment to the City of New Smyrna Beach and the required eight (8) percent UC Resolution 28-78 R&R assessment from the applicable rate.
2. Tier Two. Over ten (10) kilowatts and less than or equal to one-hundred (100) kilowatts provided they comply with the then in effect UC Standardized Interconnection Requirements for units of such size and do not exceed ninety (90) percent of the customer's maximum potential alternating current demand served by all sources. UC fees for such installations will be cost-based for the specific installation, including application fees. However, compensation for energy delivered onto the UC system shall exclude the Charter required six (6) percent payment to the City of New Smyrna Beach, the required eight (8) percent UC Resolution 28-78 R&R assessment from the applicable rate, and the applicable Transmission system cost and generation capacity cost in effect during the billing cycle for payments earned under this tariff.
3. Tier Three. Greater than one hundred (100) kilowatts and less than or equal to two thousand (2,000) kilowatts provided they comply with the then in effect UC Standardized Interconnection Requirements for units of such size and do not exceed ninety (90) percent of the customer's maximum potential alternating current demand served by all sources. UC fees for such installations will be cost-based for the specific installation, including application fees. However, compensation for energy delivered onto the UC system shall exclude the Charter required six (6) percent payment to the City of New Smyrna Beach, the required eight (8) percent UC Resolution 28-78 R&R assessment from the applicable rate, the applicable embedded fuel costs in effect during the billing cycle, and the applicable transmission and ancillary transmission costs and generation capacity cost in effect during the billing cycle for payments earned under this tariff.

4. If the kWh delivered to the UC System exceeds the kWh delivered to the Customer's home in a billing cycle, a credit for the net kWh delivered to the UC's system shall be carried forward to the next billing cycle. Credits may accumulate and be carried forward for a 12 month period. The 12 month period is defined as the first billing cycle in which the installation has been approved by the UC for interconnection and will continue for each successive month concluding with the 12th billing cycle ("reconciliation month"). At the conclusion of the 12th billing cycle the net balance will be paid the Customer for net excess energy delivered to the UC's System at the end of the 12 month period based upon UC costs in effect during said month of the 12th billing. Such payment will be forthcoming within 60 days of such reconciliation date. The 12 month reconciliation cycle will be repeated until such agreement is terminated by either party at which time the UC costs for that month will be used to determine any payments, if any, which will be forthcoming within 60 days of such reconciliation date.

- * The designated technologies of fuel cell, wind, solar-thermal, solar-voltaic, sustainably-managed biomass, vegetable-base oil, tidal, geothermal, methane waste, waste-to-energy, or fuel-cell combined heat and power (CHP) systems are currently regarded as renewable sources.

B. Green Attributes

The UC shall install, at UC's sole expense, metering equipment capable of measuring the total system output of interconnected customer-owned renewable generation. The customer shall install the appropriate meter socket and associated electrical circuits as may be required for the customer's renewable generation. The UC shall have the right to receive, and is solely responsible to apply and qualify for, the benefits of any and all Green Attributes created or granted as a result the total system output of interconnected customer-owned renewable generation. The term "Green Attributes" shall include any and all credits, certificates, benefits, environmental attributes, emissions reductions, offsets, and allowances, however entitled, attributable to the generation of electricity from the customer owned-renewable generation and its displacement of conventional energy generation.

II. APPLICATION FOR SERVICE:

The Customer must apply for service by providing the Company with an executed Application for Interconnection and an executed Interconnection Agreement, all of which are available from UC engineering. UC staff is hereby authorized to amend technical requirements, including the designated renewable technologies, of said Application and Interconnection Agreement as may be appropriate from time-to-time based upon the individual circumstances or applications onto the UC's electric system.

No application fee shall apply for Tier One Customers.

Tier Two Customers shall pay a \$275 application fee to cover the cost for processing the application and review of the proposed interconnection impact on the UC's electric system. Such Interconnection shall be consistent with prudent utility practice, industry criteria, and shall not whatsoever require any costs, including overheads and indirects, to the UC for upgrade or construction on the UC's electric system.

Tier Three Customers shall pay a \$750 application fee to cover the cost for processing the application and review of the proposed interconnection impact on the UC's electric system, plus the actual UC cost of a formal Interconnection Study. Such Interconnection shall be consistent with prudent utility practice, industry criteria, and shall not whatsoever require any costs, including overheads and indirects, to the UC for upgrade or construction on the UC's electric system.

III. CHARACTER OF SERVICE:

Continuous, 60 cycle single or three phase alternating current delivered at one standard offering secondary or primary distribution voltage or transmission voltage, phase and voltage depending on availability and the customer's requirements. Under these demand provisions, the customer agrees to maintain power factors at .98 or greater but not to exceed 1.02 of unity.

EFFECTIVE: November 1, 2013

(Standby Electric and On-Site Generation) SE/OSG (Cont.)
INTERIM NET METERING RIDER TO UC RESIDENTIAL AND GENERAL
SERVICE SCHEDULES
EXCLUDING ALL LOAD MANAGEMENT SCHEDULES

IV. INTERCONNECTION:

A. TERM

A minimum of one year from commencement of service under this Rider and for such additional time as the customer continues to qualify for said service on a month-to-month basis unless terminated by the customer of the UC. The UC may remove a customer not meeting the criteria for mandatory or elective service at any time. A customer cannot resume said service except on a case-by-case basis as determined solely by the UC.

B. GENERAL TERMS AND CONDITIONS

1. The charges calculated under this tariff are subject to change in such an amount as may be approved and/or amended by the Utilities Commission or under the provisions of applicable tariffs and riders.
 - a. Customer-owned renewable generation shall be considered certified for interconnected operation if it has been submitted by a manufacturer to a nationally recognized testing and certification laboratory, and has been tested and listed by the laboratory for continuous interaction operation with an electric distribution system in compliance with the applicable **Codes and Standards**. The Customer shall conform to all applicable codes and standards for safe and reliable operation. Among these are the National Electric Code (NEC), National Electric Safety Code (NESC), the Institute of Electrical and Electronics Engineers (IEEE), American National Standards Institute (ANSI), and Underwriters Laboratories (UL) standards, and local, state and federal building codes. The Customer shall be responsible to obtain all applicable permit(s) for the equipment installations on their property.
 - b. Codes and standards for inverter installations will be in compliance with all applicable standards including of IEEE 1547, IEEE 1547a, IEEE 1547.1, and UL 1741 IEEE Standard 519-1992 Harmonic Limits.

c. Non-Inverter-Based Interconnection Requirements

In addition to applicable inverter codes and standard, the Application for such Interconnection may require more detailed UC review, testing, and approval, at Customer cost, of the equipment proposed to be installed to ensure compliance with other additional and applicable standards including:

- IEEE Standard 1547-2003 Standard for Interconnecting Distributed Resources with Electric Power Systems
- ANSI Standard C37.90-2005, IEEE Standard for Relays and Relay Systems Associated with Electric Power Apparatus

d. Customers proposing such interconnection may also be required to submit a power factor mitigation plan for UC review and approval.

e. The Customer shall provide a written report that Customer-owned renewable generation complies with the foregoing standards.

2. Customer-owned renewable generation shall include a utility-interactive inverter, or other device certified pursuant to No. 1 immediately above, that performs the function of automatically isolating the Customer-owned generation equipment from the electric grid or circuit should the grid or circuit lose power or become de-energized. For Tiers Two and Three installations of additional requirements such as protective and isolation relaying and synchronous generation relays may be required by UC Engineering and will be reviewed on a case-by-case basis.

SERVICE SCHEDULES

EXCLUDING ALL LOAD MANAGEMENT SCHEDULES

3. The Customer shall be responsible for protecting its Customer-owned renewable generation equipment, inverters, protective devices, and other system components from damage from the normal and abnormal conditions and operations that occur on the UC electrical system in delivering and restoring power; and shall be responsible for ensuring that Customer-owned renewable generation equipment is inspected, maintained, and tested with the manufacturer's instructions to ensure that it is operating correctly and safely. The Customer agrees to provide and maintain general liability insurance for personal and property damage, or sufficient guarantee and proof of self-insurance of not less than one hundred thousand dollars (\$100,000) for Tier One inverter-based solar photovoltaic (PV) systems, one million dollars (\$1,000,000) for all other Tier One, one and one-half million dollars (\$1,500,000) for Tier Two, and two million dollars (\$2,000,000) for Tier Three during the entire period of the Interconnection Agreement.
4. The Customer agrees to provide City of New Smyrna Beach Building Code Official inspection and certification of the installation. The certification shall reflect that the Official has inspected and certified that the installation was permitted, has been approved, and has met all National Electric Code electric and ASME mechanical qualifications as applicable.
5. The UC reserves the right to inspect Interconnection , but not be limited to, such generating facilities, pertinent equipment, and instructions, to insure compliance with its Interconnection Agreement, upon reasonable notice or without notice in the event of an emergency or hazardous condition. Such inspection or observation by the UC shall not be deemed to be or construed in any way whatsoever as a direct or implied warranty by the UC of the safety, durability, suitability, or reliability of such equipment. The UC further reserves the right to disconnect the Customer-owned renewable generation at any time. The UC shall require the Customer to install, at the Customer's expense, a lockable, manual disconnect switch of the visible load-break type separate from, but adjacent to the meter socket(s) for UC meters, to provide a separation point between the AC power output of the Customer-owned renewable generation and any Customer wiring connected to the UC's system.

6. The Customer shall be solely responsible to disconnect the Customer-owned renewable generation and the Customer's other equipment if conditions on the UC system could adversely affect the Customer-owned renewable generation.
7. No interconnection of such renewable Customer-owned generation is permissible until approved by the UC by written acceptance. Such Interconnection Agreement is not assignable without written 30 day notice and agreement by either Party which consent shall not be unreasonably withheld or delayed. Furthermore, the Customer shall not enter into any lease agreement that results directly or indirectly in the retail purchase of electricity nor the retail sale, directly or indirectly, of electricity from the Customer-owned renewable generation.
8. The Customer shall notify the UC of any anticipated modifications to said system 30 days in advance of such proposed changes through a new application specifying such equipment changes or new equipment and will require written approval by the UC and the City of New Smyrna Beach or Volusia County Building Inspection Department.
9. The Customer shall indemnify, hold harmless and defend the UC from and against any and all liability, proceeding, suits, cost or expense for loss, damage or injury to persons or property, including the Customer-owned renewable generation, in any manner directly or indirectly connected with, or growing out of operation of the Customer-owned renewable generation, except in those cases where loss occurs due to the negligent actions of the UC as may be determined by Florida law. Under the limits permissible by Florida municipal law, the UC shall hold harmless and indemnify the Customer for all loss to third parties resulting from the operation of the UC's system, except when the loss occurs due to the negligent actions of the Customer.

C. INCREASE IN RATES AND CHARGES

All rates and charges billed under a Service Classification and Its Rider, including the Minimum Charge, shall be increased pursuant to the applicable required tax rates and other applicable governmental required fee payments by the United States, the State of Florida, Volusia County, the Utilities Commission or the City of New Smyrna Beach, as appropriate, for wherein the customer takes service.

EFFECTIVE: November 1, 2013

UTILITIES COMMISSION, CITY OF NEW SMYRNA BEACH, FLORIDA

RATES, CHARGES AND FEES

CAPACITY FEE CHARGES - POTABLE WATER

The potable water capacity fee charge is established based on meter size and number of meters requested. The capacity fee charge per meter size for potable water is as listed on the TABLE below:

TABLE – POTABLE WATER

<u>Meter Size (inch)</u>	<u>Capacity Fee (\$)</u>
5/8"	\$1,340.00
1"	\$3,350.00
1-1/2" (1.5")	\$6,700.00
2"	\$10,720.00
3"	\$20,100.00
4"	\$33,500.00
6"	\$67,000.00
8"	\$107,200.00
10"	\$154,100.00
12"	\$288,100.00

Notes:

1. For commercial projects:
 - a. The meter size (and accompanying backflow device) must match the size of supply plumbing to the building.
 - b. The applicant must provide signed and sealed plumbing plans prior to acceptance of capacity fees for review by Commission's Engineering Department.
 - c. The Utilities Commission Engineering Department may accept "a meter size"* smaller than the proposed plumbing, provided signed and sealed engineering calculations by a MEP Engineer are provided for review and acceptance.
 - d. Meter and backflow devices must be same size.
 - e. Master meters are only permitted for buildings three stories or more. System pressure diminishes above the second floor. Special equipment (by developer/owner) may be required for floors 3 and above.

(*Example: 4" plumbing would have an opportunity provided by calculation by land owner/developer for a 3" meter, but no smaller.)

CAPACITY FEE CHARGES - POTABLE WATER (Cont.)

Notes: (Cont.)

2. The Utilities Commission, City of New Smyrna Beach only offers the meter sizes listed above.
3. The fees listed above are for each meter.
4. The fees will not be applied to existing meters.
5. Fees will only apply to each new meter whether residential, commercial, industrial, common area, expansion, upsizing, etc.
6. A credit will be given for the existing meter when that meter is replaced with a larger meter.
7. The capacity fee does not include other fees.

EFFECTIVE: May 1, 2017

RATES, CHARGES AND FEES

CAPACITY FEE CHARGES - IRRIGATION WATER

The irrigation water capacity fee charge is established based on meter size and number of meters requested. The capacity fee charge per meter size for irrigation water is as listed on the TABLE below:

TABLE – IRRIGATION WATER

<u>Meter Size (inch)</u>	<u>Capacity Fee (\$)</u>
5/8"	\$2,680.00
1"	\$6,700.00
1-1/2" (1.5")	\$13,400.00
2"	\$21,440.00
3"	\$40,200.00
4"	\$67,000.00
6"	\$134,000.00
8"	\$214,400.00
10"	\$308,200.00
12"	\$576,200.00

Notes:

1. Irrigation meters are used primarily for irrigation purposes and are generally the second meter for an account.
2. An independent irrigation meter is possible without a potable water meter.
3. Irrigation meters are also used to serve common areas in both residential and commercial developments (each development is either a residential or commercial development).
4. There are no sanitary connections associated with an irrigation meter.
5. The Utilities Commission, City of New Smyrna Beach only offers the meter sizes listed above.
6. The fees listed above are for each meter.
7. The fees will not be applied to existing meters.
8. Fees will only apply to each new meter whether residential, commercial, industrial, common area, expansion, upsizing, etc.
9. A credit will be given for the existing meter when that meter is replaced with a larger meter.
10. The capacity fee does not include other fees.

EFFECTIVE: May 1, 2017

RATES, CHARGES AND FEES

CAPACITY FEE CHARGES - WASTEWATER

The wastewater capacity fee charge is established based on meter size and number of meters requested. The capacity fee charge per meter size for wastewater is as listed on the TABLE below:

TABLE – WASTEWATER

<u>Potable Water Meter Size (inch)</u>	<u>Capacity Fee (\$)</u>
5/8"	\$1,290.00
1"	\$3,225.00
1-1/2" (1.5")	\$6,450.00
2"	\$10,320.00
3"	\$19,350.00
4"	\$32,250.00
6"	\$64,500.00
8"	\$103,200.00
10"	\$148,350.00
12"	\$277,350.00

Notes:

1. Regardless of the potable water meter size and corresponding wastewater capacity fee, the smallest residential wastewater connection (lateral) shall be four (4) inches.
2. Regardless of the potable water meter size and the corresponding wastewater capacity fee, the smallest commercial wastewater connection (lateral) shall be six (6) inches.
3. The wastewater capacity fee shall be based on the potable water meter size service for the proposed unit. (Unit refers to single residential home, separate commercial services, including lease and purchase space, etc.)
4. The Utilities Commission, City of New Smyrna Beach only offers the meter sizes listed above.
5. The fees listed above are for each wastewater connection.
6. The fees will not be applied to existing wastewater connections.
7. Fees will only apply to each new wastewater connection, whether residential, commercial, industrial, common area, expansion, upsizing, etc.
8. A credit will be given for the existing meter when that meter is replaced with a larger meter.
9. The capacity fee does not include other fees.

CAPACITY FEE CHARGES - RECLAIMED WATER

The reclaimed water capacity fee charge is established based on meter size and number of meters requested. The capacity fee charge per meter size for reclaimed water is as listed on the TABLE below:

TABLE – RECLAIMED WATER

<u>Meter Size (inch)</u>	<u>Capacity Fee (\$)</u>
3/4"	\$1,060.00
1"	\$1,767.00
1-1/2" (1.5")	\$3,533.00
2"	\$5,653.00
3"	\$10,600.00
4"	\$17,667.00
6"	\$35,333.00
8"	\$56,533.00
10"	\$81,267.00
12"	\$151,933.00

Notes:

1. The reclaimed water capacity fee shall be based on the reclaimed water meter size serving the proposed unit. (Unit refers to single residential home, separate commercial services, including lease and purchase space.)
2. The Utilities Commission, City of New Smyrna Beach only offers the meter sizes listed above.
3. The fees listed above are for each reclaimed meter requested or proposed.
4. The fees will not be applied to existing reclaimed water meters.
5. Fees will only apply to each new reclaimed water connection, whether residential, commercial, industrial, common area, expansion, upsizing, etc.
6. A credit will be given for the existing meter when that meter is replaced with a larger meter.
7. The capacity fee does not include other fees.

RATES, CHARGES AND FEES

CAPACITY FEE CHARGES - NOTES

1. A 5/8" potable water meter will be considered one Equivalent Residential Unit (ERU) which represents a nominal usage (or level of service) of 200 gallons per day for potable water, as determined by utilizing historical customer account records and water sales for the Utilities Commission's system.
2. A 3/4" reclaimed meter will be considered one Equivalent Residential Unit (ERU) which represents a nominal usage (or level of service) of 780 gallons per day for reclaimed water, as determined by utilizing historical customer account records and water sales for the Utilities Commission's system.
3. A 5/8" irrigation water meter will be considered one Equivalent Residential Unit (ERU) which represents a nominal usage (or level of service) of 400 gallons per day for potable water, as determined by utilizing historical customer account records and water sales for the Utilities Commission's system.
4. The aforementioned capacity fee charges constitute potable water, irrigation water, wastewater and reclaimed water capacity fee charges only and such charges shall be paid before any connection will be made, and only upon determination by the Utilities Commission that existing water facilities are available to which the connection is made.
5. Payment of the aforementioned capacity fee charges must be made to the Utilities Commission, City of New Smyrna Beach, Florida, in advance of issuance of building permits within our service area.
6. The aforementioned charges as detailed above apply to all applications for service approved subsequent to the effective date of Resolution No. 1-17 and because capacity fee charges cannot be held in abeyance indefinitely, the application for water, wastewater, irrigation water and reclaimed water service shall be restricted to be in effect ninety (90) days or as long as the original building permit is valid, whichever is longer. In the event the service connection has not been made prior to the aforementioned restriction, water, wastewater, irrigation water and reclaimed water capacity fee charges will be subject to revision to the successor fee schedule.

EFFECTIVE: May 1, 2017

UTILITIES COMMISSION, CITY OF NEW SMYRNA BEACH, FLORIDA

RATES, CHARGES AND FEES

**FINANCING - CAPACITY FEES, METER SETTING FEES,
TAP-IN FEES AND CUT-IN FEES**

Upon certification by the Commission's Engineering Department that the service connection has not been made for the specific application for service and the applicant has withdrawn the application for service (in writing), the water, irrigation water, wastewater and reclaimed water capacity fee charges that have been paid will be subject to refund without interest.

Such water, irrigation water, wastewater and reclaimed water capacity charges are in addition to meter setting installation charges, line extension contributions, or other charges and fees as may be appropriate for services rendered.

Financing of payment of water, irrigation water, wastewater and reclaimed water capacity fees, meter setting charges, tap-in fees and cut-in charges will be available pursuant to the terms and conditions listed below:

1. Financing would be available to all individual residential customer applicants.
2. A 12-month or 24-month financing period will be utilized.
3. An annual interest rate of 2% above prime shall be used.
4. The customer must execute an agreement which states the utilities applicable (water, irrigation water, wastewater and/or reclaimed water) will be terminated if the customer is in default of payments. All payments previously made are non-refundable.
5. All payments must be accelerated and due in full prior to transfer of ownership of the property.
6. A non-refundable administrative fee of \$50.00 must be paid at the time of application in order to reimburse the Utilities Commission, City of New Smyrna Beach, for services required to administer the records and financing process.

CHARGES FOR WATER METER SETTING INSTALLATIONS

Connection facilities for water service will be installed by the Utilities Commission, the cost of which is to be paid from the water meter setting installation charge set out herein, which will include pipe from the water main to the property line, fittings and other material related to a normal connection and a water meter, whenever the applicant shall have paid therefore the required deposit for the water service, line extension contributions, water connection fee charges, or other charges and fees as may be appropriate for service rendered. The water meter setting installation charges shall be as follows:

<u>Water Meter Size (Inches)</u>	<u>Water Setting Installation Charge</u>	<u>Supplemental Meter Setting Installation Charge</u>
5/8	\$ 400	\$ 300
1	450	350
1-1/2	850	750
2	950	850
3	6,000	5,400
4	7,000	6,350

All water meter setting installation charges 1-1/2 or larger that require a street crossing or long service (long side service) will be determined by the Utilities Commission's Engineering Department and based on the recovery of cost of such installation. Water meter setting installation charges for all connections over 4" will be determined by the Utilities Commission's Engineering Department and based on the recovery cost of such installation.

To qualify as a supplemental meter setting, meters shall meet all of the following conditions:

1. The customer shall have an existing domestic meter.
2. The supplemental meter requested is equal to or smaller than the existing domestic meter.
3. The Utilities Commission taps the existing domestic service between the meter and main, but no tap is made on the same water main.

EFFECTIVE: August 11, 2004

RATES, CHARGES AND FEES

CHARGES FOR WATER METER SETTING INSTALLATIONS (Cont.)

Residential subdivisions, with five or more building lots, that have the water main, service line to the property line, fittings and other material relating to a normal connection paid for and installed by the same person or entity and in accordance with the Utilities Commission's specifications; the applicant as herein defined shall receive a refund of \$260.00 toward the 5/8" water meter setting installation charge. Should the installation not meet the minimum construction standards set by the Utilities Commission, at the time of meter installation, no refund shall be given to the applicant. The applicant is defined as the person or entity who has made actual application to the Utilities Commission for 5/8" water service and who has paid all 5/8" water meter setting installation charges.

Such water meter setting installation charges are in addition to water capacity fee charges, line extension contributions, or other charges and fees which may be appropriate for service rendered.

EFFECTIVE: August 11, 2004

UTILITIES COMMISSION, CITY OF NEW SMYRNA BEACH, FLORIDA

RATES, CHARGES AND FEES

WATER MAIN EXTENSION POLICY

Applications for an extension of the Utilities Commission's water system shall be in writing stating the location, beginning and termination thereof, with plans and specifications in triplicate attached where such plans and specifications are required. Such written request shall be submitted to the Director of Engineering, approved by the Director of Engineering and all terms and conditions relating to said extension shall be made and executed by and between the applicant property owner and/or contractor and the Utilities Commission.

No unauthorized person, without prior written consent of the Utilities Commission, may tap any pipe or main belonging to the Utilities Commission. All unauthorized connections shall be subject to discontinuance until full payment is made for such service, including administrative costs, testing, etc.

All pipes, conduits or other component parts of service installed in or upon the premises of a customer shall conform to Utilities Commission standards of type, quality, quantity and regulations regarding installation. All on-site facilities must be maintained by applicant according to Utilities Commission standards. Unauthorized alteration or modification of an on-site utility service interconnection may result in immediate termination of the affected service and repair or restoration at the applicant's cost.

Fire service extensions apply solely for commercial, industrial and/or multi-family customers. The Utilities Commission provides adequate fire protection facilities for typical residential service and will not pay for the increment of any oversized pipe from domestic flows to fire service flows for a commercial, industrial or multi-family installation.

Prior to Utilities Commission approval of the applicant's water service plans, the applicant must enter into a Developer's Agreement which shall be binding upon the applicant and its successors and assigns. Developer's Agreements may not be assigned to subdivision parcels and/or lots.

The Utilities Commission requires contributions-in-aid-of-construction, preferably through the installation of water transmission facilities by the applicant desiring system extension with title to such facilities being transferred to the Utilities Commission when the installation has been completed. Cash payment of water system capacity fees by the applicant represents a condition precedent to the execution of permit applications to the Department of Environmental Protection for the construction of water system extensions.

EFFECTIVE: April 17, 2006

UTILITIES COMMISSION, CITY OF NEW SMYRNA BEACH, FLORIDA

RATES, CHARGES AND FEES

WATER MAIN EXTENSION POLICY (Cont.)

Each applicant shall be responsible for design, installation, inspection and testing of the complete water distribution system (water mains, valves, fittings, services, hydrants and all appurtenances as shown upon the approved design plans for such water distribution system) located in the street or streets adjoining or within the boundaries of the applicant's property (within the right-of-way or easement). The applicant shall be responsible for the above and shall dedicate the above at no cost to the Utilities Commission.

The design of water facilities prepared by a registered professional Civil Engineer shall be recognized by the Utilities Commission, subject to the approval of the Director of Engineering.

As a prerequisite to the construction of any water system proposed to be connected to the Utilities Commission water distribution system, the applicant shall grant any and all easements and rights-of-way, without cost, as may be necessary.

The Utilities Commission's representative shall inspect the installation of all water facilities installed which are proposed to be transferred to the Utilities Commission's ownership. In addition, the Utilities Commission's representative shall be present at all testing of the component parts of the water distribution system. The results of said testing shall be certified by the engineer of record. The Director of Engineering will be notified three (3) days prior to testing.

Water facilities constructed prior to interconnection with the Utilities Commission's existing facilities shall be conveyed to the Utilities Commission via Bill of Sale which shall be free of all liens and encumbrances. The Utilities Commission will not accept transfer of consumer lines, plumber lines or consumers installation located on the discharge side of the water meter or on the customer side of the point of delivery of service. Said facilities will remain the maintenance responsibility of the applicant or subsequent customers. The Utilities Commission will not accept title to any component part of the water system constructed by the applicant until the Director of Engineering has approved the construction of said lines, verified the inspection of the construction and accepted the tests associated with the construction and disinfection of such facilities. The applicant must keep accurate cost records of all applicable water distribution facilities and must submit these with the Bill of Sale.

EFFECTIVE: April 17, 2006

UTILITIES COMMISSION, CITY OF NEW SMYRNA BEACH, FLORIDA

RATES, CHARGES AND FEES

WATER MAIN EXTENSION POLICY (Cont.)

Residential off-site water system services in undeveloped areas include:

1. Temporary extensions less than 6-inches in diameter may be permitted on a case-by-case basis based on public necessity. No Utilities Commission participation, credits or other customer tie-ins will be allowed. Fire protection is not included and applicant must pay all prevailing rates, fees and charges and is totally responsible for all costs associated with this extension, including looping the system which is a requirement.
2. 6-inch Water Main Extensions - The main extensions from the Utilities Commission system to the applicant's on-site facilities is required to be paid by the applicant.
3. 8-inch Diameter or Larger Water Main Extensions - If the applicant requires a 6-inch water main and oversizing is required, the Utilities Commission may, in order to promote a project also needed for other purposes, pay for the material cost of the differential between a 6-inch and the larger diameter main.

Residential off-site water system services in developed areas include:

1. The Utilities Commission shall provide three options for service for developed areas. Those options include:
 - Customer Payment
 - Area Development Agreement
 - Water Special District (Assessment, Taxing or Otherwise)
2. The Utilities Commission shall construct the extension upon collection of capacity fees and extension costs from one hundred percent (100%) of those customers upon said extension. Each extension will be reviewed for feasibility based on prudent engineering standards.

The remainder of the policies for individual customers within undeveloped areas apply.

3. An area development agreement would be considered the same as any other Developer's Agreement.

EFFECTIVE: April 17, 2006

UTILITIES COMMISSION, CITY OF NEW SMYRNA BEACH, FLORIDA

RATES, CHARGES AND FEES

WATER MAIN EXTENSION POLICY (Cont.)

4. Special districts, special assessments or special taxing may be instituted within the Utilities Commission service area. These shall be considered as a development and on-site and off-site costs shall be required similar to any other applicant in an undeveloped area. The off-site improvements and extensions shall be handled similar to those for water facilities.

Commercial off-site water system services in undeveloped areas include:

1. Water main requirements, except for fire service, shall be the same as for residential service.

Commercial off-site water system services in developed areas include:

1. Water main requirements, except for fire service, shall be the same as for residential service in developed areas.

Hydraulic share for water mains is defined as follows:

1. 6" - 270 ERU's
2. 8" - 600 ERU's
3. 10" - 1,000 ERU's
4. 12" - 1,700 ERU's
5. 16" - 3,400 ERU's

Other calculations may be accepted by the Director of Engineering, if performed and properly sealed by a Florida Licensed Professional Engineer, using constants, and rates accepted by the Director of Engineering.

Utility inspection fees shall be \$50.00 per water ERU.

The Utilities Commission requires in many cases, in addition to the contribution provisions set forth herein, construction by the developer to provide for off-site extension of water necessary to connect the applicant's property with the then terminus of the water facilities adequate in size to provide service as deemed appropriate by the Director of Engineering.

Additional Infrastructure Needs - Any Utilities Commission utility infrastructure needs will be considered separately.

EFFECTIVE: April 17, 2006

RATES, CHARGES AND FEES

WATER MAIN EXTENSION POLICY (Cont.)

Financing of payment of water extensions is available pursuant to the terms and conditions listed below:

1. Financing would be available to all individual residential customer applicants.
2. A 12-month or 24-month financing period will be utilized.
3. An annual interest rate of 2% above prime shall be used.
4. The customer must execute an agreement which states water will be terminated if the customer is in default of payments. All payments previously made are non-refundable.
5. All payments must be accelerated and due in full prior to transfer of ownership of the property.
6. A non-refundable administrative fee of \$50.00 must be paid at the time of application in order to reimburse the Utilities Commission, City of New Smyrna Beach, for services required to administer the records and financing process.

EFFECTIVE: April 17, 2006

RATES, CHARGES AND FEES

FIRE HYDRANT MAINTENANCE RATE SCHEDULE

*****THIS RATE WAS SUSPENDED ON APRIL 18, 2016--AGENDA ITEM 8-a*****

The Utilities Commission shall provide fire hydrant maintenance service upon request throughout the Utilities Commission's service area. The following rates are set by the Utilities Commission.

<u>Rates</u>	<u>Each Hydrant</u>
Annual Maintenance of a Fire Hydrant	\$ 100.00*

- *Annual Maintenance includes:
 - Fill Oil Reservoir, Operate Hydrant
 - Exercise Lead, Isolation Valve
 - Flush, Flow Test (Inc. Water Usage), Record Results
 - Weeding, Paint
 - Other Repairs as Required

The fire hydrant maintenance rate does not include the cost of installation of additional and new hydrants and upsizing water distribution system to meet or exceed fire flow requirements which will go through the Engineering Department and be paid in advance at current rates for parts/labor.

Fire hydrants installed pursuant to Florida Department of Environmental Protection Rules and Regulations.

Terms of Payment

The terms of payment shall be in accordance with the payment policies of the Utilities Commission.

EFFECTIVE: February 28, 2005

RATES, CHARGES AND FEES

WASTEWATER TAP-IN INSTALLATION CHARGE

The wastewater tap-in installation charge shall be applied to all wastewater service installations if the applicant requires a separate wastewater tap-in because:

- a. No previous tap-in has been indicated by the Commission's record drawings;
- b. The applicant requested a tap-in location different from the existing tap-in location;
- c. The existing tap-in was damaged by the applicant.

Based on the criteria above, the wastewater tap-in installation charge shall be \$350.00 for a standard installation. If any installation is determined by the Engineering Department to require substantially more manhours, equipment, or materials, then the wastewater tap-in installation charge shall be individually calculated and assessed. It is the applicant's responsibility to expose the wastewater (sewer) main for tapping and burying the main after the tap is made. It is the applicant's responsibility to obtain any required permits to perform this work.

Such wastewater tap-in installation charge is in addition to wastewater capacity fee charges, line extension contributions, or other charges or fees which may be appropriate for services rendered.

EFFECTIVE: August 11, 2004

WASTEWATER MAIN EXTENSION POLICY

Applications for an extension of the Utilities Commission's wastewater system shall be in writing stating the location, beginning and termination thereof, with plans and specifications in triplicate attached where such plans and specifications are required. Such written request shall be submitted to the Director of Engineering, approved by the Director of Engineering and all terms and conditions relating to said extension shall be made and executed by and between the applicant property owner and/or contractor and the Utilities Commission.

No unauthorized person, without prior written consent of the Utilities Commission, may tap any pipe or main belonging to the Utilities Commission. All unauthorized connections shall be subject to discontinuance until full payment is made for such service, including administrative costs, testing, etc.

All pipes, conduits or other component parts of service installed in or upon the premises of a customer shall conform to Utilities Commission standards of type, quality, quantity and regulations regarding installation. All on-site facilities must be maintained by applicant according to Utilities Commission standards. Unauthorized alteration or modification of an on-site utility service interconnection may result in immediate termination of the affected service and repair or restoration at the applicant's cost.

Prior to Utilities Commission approval of the applicant's wastewater service plans, the applicant must enter into a Developer's Agreement which shall be binding upon the applicant and its successors and assigns. Developer's Agreements may not be assigned to subdivision parcels and/or lots.

The Utilities Commission requires contributions-in-aid-of-construction, preferably through the installation of wastewater collection facilities by the applicant desiring system extension with title to such facilities being transferred to the Utilities Commission when the installation has been completed. Cash payment of wastewater system capacity fees by the applicant represents a condition precedent to the execution of permit applications to the Department of Environmental Protection for the construction of wastewater system extensions.

Each applicant shall be responsible for design, installation, inspection and testing of the complete wastewater collection system (collection mains, laterals to the point of clean-out within the right-of-way or easement, force mains, lift or pumping stations, including the site for the same, and all appurtenances as shown upon the approved design plans for such wastewater collection system) located in the street or streets adjoining or within the boundaries of the applicant's property (within the right-of-way or easement). The applicant shall be responsible for the above and shall dedicate the above at no cost to the Utilities Commission.

EFFECTIVE: April 17, 2006

UTILITIES COMMISSION, CITY OF NEW SMYRNA BEACH, FLORIDA

RATES, CHARGES AND FEES

WASTEWATER MAIN EXTENSION POLICY (Cont.)

The design of wastewater facilities prepared by a registered professional Civil Engineer shall be recognized by the Utilities Commission, subject to the approval of the Director of Engineering.

As a prerequisite to the construction of any wastewater system proposed to be connected to the Utilities Commission wastewater collection system, the applicant shall grant any and all easements and rights-of-way, without cost, as may be necessary.

The Utilities Commission's representative shall inspect the installation of all wastewater facilities installed which are proposed to be transferred to the Utilities Commission's ownership. In addition, the Utilities Commission's representative shall be present at all testing of the component parts of the wastewater collection system. The results of said testing shall be certified by the engineer of record. The Director of Engineering will be notified three (3) days prior to testing.

Wastewater facilities constructed prior to interconnection with the Utilities Commission's existing facilities shall be conveyed to the Utilities Commission via Bill of Sale which shall be free of all liens and encumbrances. The Utilities Commission will not accept transfer of consumer lines, plumber lines or consumers installation located on the discharge side of the water meter or on the customer side of the point of delivery of service. Said facilities will remain the maintenance responsibility of the applicant or subsequent customers. The Utilities Commission will not accept title to any component part of the wastewater system constructed by the applicant until the Director of Engineering has approved the construction of said lines, verified the inspection of the construction and accepted the tests associated with the construction and disinfection of such facilities. The applicant must keep accurate cost records of all applicable pollution control collection facilities and must submit these with the Bill of Sale.

Residential off-site wastewater collection system services in undeveloped areas include:

1. 100 GPM lift stations are the minimum size lift stations for off-site use within the Utilities Commission service area. The 100 GPM capacity is necessary for scour velocities within the 4-inch force mains from such facilities, and thereby shall be minimum.
2. Lift stations greater than 100 GPM must be paid for completely by the applicant. The Utilities Commission reserves the right to oversize the lift station paying for the incremental material cost for oversizing.

EFFECTIVE: April 17, 2006

RATES, CHARGES AND FEES

WASTEWATER MAIN EXTENSION POLICY (Cont.)

3. 4-inch force mains shall be paid for by the applicant from the point of connection to the Utilities Commission to the on-site facilities.
4. 6-inch force mains or larger that are extensions of Utilities Commission facilities requiring oversizing may at the Commission's discretion be paid for by the Utilities Commission.
5. For 6-inch or larger system extensions the Utilities Commission may credit some portion of the cost if it is in the Commission's interest to promote the extension of this line. The applicant is responsible for the remainder of the cost of the force main extension. The Utilities Commission reserves the right to oversize such facilities and pay for said oversizing in accordance with Utilities Commission policies.

Residential off-site water system services in developed areas include:

1. The Utilities Commission shall provide three options for service for developed areas. Those options include:
 - Customer Payment
 - Area Development Agreement
 - Water Special District (Assessment, Taxing or Otherwise)
2. The Utilities Commission shall construct the extension upon collection of capacity fees and extension costs from one hundred percent (100%) of those customers upon said extension. Each extension will be reviewed for feasibility based on prudent engineering standards.
3. The customer shall pay the cost for all line extensions to the wastewater system. Such extensions shall be in accordance with the Commission's policies. Road and/or drainage restoration costs shall be borne by the applicant, City and/or County as applicable.

The remainder of the policies for individual customers within undeveloped areas apply.

4. An area development agreement would be considered the same as any other Developer's Agreement.

EFFECTIVE: April 17, 2006

UTILITIES COMMISSION, CITY OF NEW SMYRNA BEACH, FLORIDA

RATES, CHARGES AND FEES

WASTEWATER MAIN EXTENSION POLICY (Cont.)

5. Special districts, special assessments or special taxing may be instituted within the Utilities Commission service area. These shall be considered as a development and on-site and off-site costs shall be required similar to any other applicant in an undeveloped area. The off-site improvements and extensions shall be handled similar to those for wastewater facilities.

Commercial off-site wastewater system services in undeveloped areas include:

1. Wastewater facilities extensions shall be in accordance with special provisions of utility standards and shall be complied with in their entirety; otherwise, the requirements shall be the same as for residential service.

Commercial off-site wastewater system services in developed areas include:

1. Extensions shall be in accordance with special provisions of utility standards and shall be complied with in their entirety; otherwise, the requirements shall be the same as for residential service in developed areas.

Hydraulic share for wastewater is defined as follows:

1. Wastewater Pumping Stations - 1 GPM Capacity per ERU

2. Wastewater Force Mains

4" - 120 ERU's
6" - 320 ERU's
8" - 700 ERU's
10" - 1,200 ERU's
12" - 2,000 ERU's

3. Wastewater Gravity Interceptors

10" - 600 ERU's
12" - 1,000 ERU's
15" - 1,800 ERU's
18" - 3,300 ERU's

Other calculations may be accepted by the Director of Engineering, if performed and properly sealed by a Florida Licenses Professional Engineer, using constants, and rates accepted by the Director of Engineering.

EFFECTIVE: April 17, 2006

UTILITIES COMMISSION, CITY OF NEW SMYRNA BEACH, FLORIDA

RATES, CHARGES AND FEES

WASTEWATER MAIN EXTENSION POLICY (Cont.)

Utility inspection fees shall be \$50.00 per wastewater ERU.

The Utilities Commission requires in many cases, in addition to the contribution provisions set forth herein, construction by the developer to provide for off-site extension of water necessary to connect the applicant's property with the then terminus of the water facilities adequate in size to provide service as deemed appropriate by the Director of Engineering.

Financing of payment of wastewater main extensions is available pursuant to the terms and conditions listed below:

1. Financing would be available to all individual residential customer applicants.
2. A 12-month or 24-month financing period will be utilized.
3. An annual interest rate of 2% above prime shall be used.
4. The customer must execute an agreement which states the wastewater service will be terminated if the customer is in default of payments. All payments previously made are non-refundable.
5. All payments must be accelerated and due in full prior to transfer of ownership of the property.
6. A non-refundable administrative fee of \$50.00 must be paid at the time of application in order to reimburse the Utilities Commission, City of New Smyrna Beach, for services required to administer the records and financing process.

EFFECTIVE: April 17, 2006

RECLAIMED WATER RATE SCHEDULE

PRIMARY TIER RATE

<u>Meter Size</u>	<u>Minimum Monthly Charge</u>	<u>Included Gallonage (Per KG) In Minimum Monthly Charge</u>	<u>Gallonage Charge Per KG Over Monthly Maximum</u>
3/4"	\$11.20	15 (0-15,000)	\$2.24 (15,001 and Above)
1"	\$28.00	45 (0-45,000)	\$2.24 (45,001 and Above)
1-1/2"	\$56.00	100 (0-100,000)	\$2.24 (100,001 and Above)
Major Users			
<u>Meter Size</u>		<u>Flow Charge Per KG</u>	
2"	\$84.00	\$0.34	
3"	\$84.00	\$0.34	
4"	\$84.00	\$0.34	
6"	\$84.00	\$0.34	

Definitions and requirements are as follows:

1. All user services must be metered.
2. Meter sizes 3/4" to 1-1/2" will be given the highest priority on availability of reclaimed water at all times.
3. Major users must provide a minimum of three (3) days of wet weather storage for the minimum flow rate of 1,900 gallons/acre/day on an annual average. Major users are defined as reclaimed water customers whose anticipated capacity exceeds 100,000 gallons per day (gpd) and/or requiring a 2" meter and above.

EFFECTIVE: November 1, 2012

RATES, CHARGES AND FEES

RECLAIMED WATER RATE SCHEDULE (Cont.)

SECONDARY TIER RATE

The secondary tier rate structure will apply to major users at \$18.24/acre/month.

Qualifications for this rate are as follows:

1. All user services must be metered.
2. Major user must provide a minimum of three (3) days of wet weather storage for the minimum flow rate of 1,900 gallons/acre/day on an annual average. Major users are defined as reclaimed water customers whose anticipated capacity exceeds 100,000 gallons per day (gpd) and/or requiring a 2" meter and above.

Restrictions for this rate are as follows:

1. The Commission will deliver reclaimed water flow to the primary tier rate users and reduce the flow to secondary tier rate users during times of limited availability of reclaimed water.
2. The user must accept the minimum flow rate stipulated under the secondary tier rate qualifications, adjusted for availability, or the account will automatically be converted to the primary tier rate schedule. The user must then meet the requirements of this level of service and may not convert back to the second tier level of service unless approval is granted by the Commission.

RECLAIMED WATER MAIN EXTENSION POLICY

Applications for an extension of the Utilities Commission's reclaimed water system shall be in writing stating the location, beginning and termination thereof, with plans and specifications in triplicate attached where such plans and specifications are required. Such written request shall be submitted to the Director of Engineering, approved by the Director of Engineering and all terms and conditions relating to said extension shall be made and executed by and between the applicant property owner and/or contractor and the Utilities Commission.

No person shall use Utilities Commission reclaimed water services without first making application in writing for service, receiving Utilities Commission approval and paying all charges incident to the application. Applications shall be made on forms provided by the Utilities Commission and requests for reclaimed water by firms, partnerships, associations and corporations shall be tendered only by their duly authorized agents with the official title of the agent shown on the application.

No free reclaimed water service shall be furnished or rendered to any person or to the City, County, State or public agency or instrumentality. All utility service furnished to the customer will be through Utilities Commission meters and may not be remetered for the purpose of selling or otherwise disposing of such service. In no case shall a customer, except with the written consent of the Utilities Commission, extend reclaimed water lines across streets, alleys, lanes, courts, property lines, avenues, or other public thoroughfares or rights-of-way in order to furnish utility service for adjacent property even though such adjacent property is owned by the same customer.

No unauthorized person, without prior written consent of the Utilities Commission, may tap any pipe or main belonging to the Utilities Commission. All unauthorized connections shall be subject to discontinuance until full payment is made for such service, including administrative costs, testing, etc.

All pipes, conduits or other component parts of service installed in or upon the premises of a customer shall conform to Utilities Commission standards of type, quality, quantity and regulations regarding installation. All on-site facilities must be maintained by applicant according to Utilities Commission standards. Unauthorized alteration or modification of an on-site utility service interconnection may result in immediate termination of the affected service and repair or restoration at the applicant's cost.

Prior to the reclaimed water plans approval by the Utilities Commission and the execution of reclaimed water system extension applications by the Utilities Commission, the applicant shall be required to execute a Developer's Agreement which shall be binding upon the applicant, its successors and assigns. Developer's Agreements may not be assigned to subdivision parcels and/or lots.

EFFECTIVE: April 17, 2006

UTILITIES COMMISSION, CITY OF NEW SMYRNA BEACH, FLORIDA

RATES, CHARGES AND FEES

RECLAIMED WATER MAIN EXTENSION POLICY (Cont.)

The Utilities Commission requires contributions-in-aid-of-construction, preferably through the installation of reclaimed water transmission facilities by the applicant desiring system extension with title to such facilities being transferred to the Utilities Commission when the installation has been completed.

Each applicant shall be responsible for design, installation, inspection and testing for the complete reclaimed water distribution system (reclaimed water mains, valves, fittings, services, hydrants and all appurtenances as shown upon the approved design plans for such distribution system) located in the street or streets adjoining or within the boundaries of the applicant's property. The applicant shall be responsible for the above and shall dedicate the above at no cost to the Utilities Commission.

The design of reclaimed water facilities must be prepared by a registered professional Civil Engineer and shall be recognized by the Utilities Commission, subject to the approval of the Director of Engineering.

As a prerequisite to the construction of any reclaimed water system proposed to the Utilities Commission system, the applicant shall agree to grant to the Utilities Commission, without cost in a form satisfactory to the Utilities Commission, such easements or rights-of-way corresponding with the installation of the proposed facilities.

The Utilities Commission's representative shall inspect the installation of all reclaimed water facilities installed which are proposed to be transferred to the Utilities Commission's ownership. In addition, the Utilities Commission's representative shall be present at all testing of the component parts of the reclaimed water system. The results of said testing shall be certified by the engineer of record. The Director of Engineering will be notified three (3) days prior to testing.

Reclaimed water facilities constructed prior to interconnection with the Utilities Commission's existing facilities shall be conveyed to the Utilities Commission via Bill of Sale which shall be free of all liens and encumbrances. The Utilities Commission will not accept transfer of consumer lines, plumber lines or consumers installation located on the discharge side of the water meter or on the customer side of the point of delivery of service. Said facilities will remain the maintenance responsibility of the applicant or subsequent customers.

EFFECTIVE: April 17, 2006

RATES, CHARGES AND FEES

RECLAIMED WATER MAIN EXTENSION POLICY (Cont.)

The Utilities Commission will not accept title to any component part of the reclaimed water system constructed by the applicant until the Director of Engineering has approved the construction of said lines, verified the inspection of the construction and accepted the tests associated with the construction and disinfection of such facilities. The applicant must keep accurate cost records of for all applicable reclaimed water facilities and must submit these with the Bill of Sale.

Residential off-site reclaimed water system services in undeveloped areas include:

1. Temporary extensions less than 6-inches in diameter may be permitted on a case-by-case basis based on public necessity. No Utilities Commission participation, credits or other customer tie-ins will be allowed. Fire protection is not included and applicant must pay all prevailing rates, fees and charges and is totally responsible for all costs associated with this extension, including looping the system which is a requirement.
2. 6-inch Reclaimed Water Main Extensions - The main extensions from the Utilities Commission system to the applicant's on-site facilities is required to be paid by the applicant.
3. 8-inch Diameter or Larger Reclaimed Water Main Extensions - If the applicant requires a 6-inch reclaimed water main and oversizing is required, the Utilities Commission may, in order to promote a project also needed for other purposes, pay for the material cost of the differential between a 6-inch and the larger diameter main.

Residential off-site reclaimed water system services in developed areas include:

1. The Utilities Commission shall provide three options for service for developed areas. Those options include:
 - Customer Payment
 - Area Development Agreement
 - Water Special District (Assessment, Taxing or Otherwise)

EFFECTIVE: April 17, 2006

UTILITIES COMMISSION, CITY OF NEW SMYRNA BEACH, FLORIDA

RATES, CHARGES AND FEES

RECLAIMED WATER MAIN EXTENSION POLICY (Cont.)

2. The Utilities Commission shall construct the extension upon collection of capacity fees and extension costs from one hundred percent (100%) of those customers upon said extension. Each extension will be reviewed for feasibility based on prudent engineering standards.

The remainder of the policies for individual customers within undeveloped areas apply.

3. An area development agreement would be considered the same as any other Developer's Agreement.
4. Special districts, special assessments or special taxing may be instituted within the Utilities Commission service area. These shall be considered as a development and on-site and off-site costs shall be required similar to any other applicant in an undeveloped area. The off-site improvements and extensions shall be handled similar to those for water facilities.
5. The customer shall pay all cost for 6-inch reclaimed water main extensions.

Commercial off-site reclaimed water system services in undeveloped areas include:

1. Reclaimed water facilities extensions shall be in accordance with special provisions of utility standards and shall be complied with in their entirety; otherwise, the requirements shall be the same as for residential service.

Commercial off-site reclaimed water services in developed areas include:

1. Reclaimed water facilities extensions shall be in accordance with special provisions of utility standards and shall be complied with in their entirety; otherwise, the requirements shall be the same as for residential service.

Hydraulic share for reclaimed water mains is defined as follows:

1. 6" - 270 ERU's
2. 8" - 600 ERU's
3. 10" - 1,000 ERU's
4. 12" - 1,700 ERU's

RATES, CHARGES AND FEES

CUSTOMER DEPOSIT

I. REQUEST FOR UTILITY SERVICES

Application for utility services may be established by telephone or in person. The requirements for such applications are as follows:

A. Residential Accounts

1. Name of Applicant
2. Social Security Number
3. Date of Birth
4. Telephone Number
5. Mailing Address

B. General Service (Commercial) Accounts

1. Name of Applicant / Corporation
2. Social Security Number / Tax Identification Number
3. Corporate Papers / Florida Business License (if applicable)
4. Telephone Number
5. Mailing Address

II. DEPOSIT

It is the policy of the Utilities Commission, City of New Smyrna Beach, Florida, to require a deposit of all new applicants for electric, water, wastewater, and reuse/reclaimed water services as follows:

A. Electric Service

1. Residential Accounts

For customers on Residential Service, the minimum deposit shall be \$75.00 and the maximum shall be \$240.00.

EFFECTIVE: April 1, 2014

UTILITIES COMMISSION, CITY OF NEW SMYRNA BEACH, FLORIDA

RATES, CHARGES AND FEES

CUSTOMER DEPOSIT (Cont.)

2. General Service (Commercial) Accounts

For customers requesting General (Commercial) Service, the required deposit shall be two times the average monthly bill as estimated by the Utilities Commission. In the event the Utilities Commission determines that the deposit is not sufficient to cover two times the actual average monthly bill, an adjustment to the required deposit may be made. In any event, the minimum deposit for all General Service electric accounts shall be \$75.00.

B. Water Service

The security deposit for each water account for the various meter sizes offered is as follows:

5/8"	\$ 25.00
1"	30.00
1-1/2"	50.00
2"	80.00
3"	150.00
4"	250.00
6"	500.00
8"	800.00

C. Wastewater (Sewer) Service

The security deposit for each wastewater account for the various meter sizes offered is as follows:

5/8"	\$ 25.00
1"	30.00
1-1/2"	50.00
2"	85.00
3"	170.00
4"	260.00
6"	520.00
8"	840.00

In the event wastewater service only is furnished by the Utilities Commission and no water is connected to the system, the deposit for the account will be determined by the Utilities Commission prior to providing service.

EFFECTIVE: April 1, 2014

UTILITIES COMMISSION, CITY OF NEW SMYRNA BEACH, FLORIDA

RATES, CHARGES AND FEES

CUSTOMER DEPOSIT (Cont.)

D. Reuse Water (Reclaimed) Service

The security deposit for each reuse service for the various service/meter sizes offered is as follows:

3/4"	\$ 10.00
1"	25.00
1-1/2"	50.00
2"	80.00
3"	160.00
4"	250.00
6"	500.00

III. DEPOSIT PAYMENT

Residential Accounts

The customer will be billed for the deposit(s) and will have ten (10) days to pay said deposit(s). If the customer does not pay the deposit(s) within the ten (10) day period, utility services will automatically be disconnected.

Deposits must be made by cash, check, money order, or Utilities Commission approved aid voucher. Credit cards will be accepted up to \$1,000.00.

The following guidelines apply to all customers requesting residential electric, water, wastewater (sewer), and reuse/reclaimed services:

- A. For existing accounts with good credit standing with the Utilities Commission at the time of adoption of this policy, their existing deposits will remain unchanged. Discontinuance of service for non-payment on existing accounts will require an additional deposit.
- B. Any new customer establishing services with the Utilities Commission will have their social security number verified by the "On-Line Utility Exchange" or any other provider of similar services. Based on the results, the customer may or may not be required to pay a deposit.

EFFECTIVE: April 1, 2014

UTILITIES COMMISSION, CITY OF NEW SMYRNA BEACH, FLORIDA

RATES, CHARGES AND FEES

CUSTOMER DEPOSIT (Cont.)

- C. Any current or returning customer, with at least six months' of history with the Utilities Commission, requesting new service will have their deposit based on current/previous account history. Customers with no more than two late fees, no disconnections for non-payment, and no returned checks, all within the most recent 24 month period, will not be required to pay a deposit. Any returning customers not meeting this criteria will be required to pay a maximum deposit.
- D. Any customer requesting service that has a paid write-off (final bill balance sent to collections) with the Utilities Commission will be required to pay the maximum deposit prior to connection of service. If the customer has an unpaid write-off with the Utilities Commission, they will be required to pay it in full, along with the maximum deposit prior to connection of service.
- E. The Utilities Commission will not transfer a deposit from one individual to another individual. Transfers of deposit(s) from one address to another address for the same individual will be made provided the account balance at the currently served location is in a current (outstanding balance is zero) status.
- F. If a customer transfers his deposit to an account within the system, the final bill on the old account, if delinquent, will be transferred to the current account for collection and becomes subject to collections and disconnect procedures.
- G. Customers that are continuously delinquent are subject to update their deposit.
- H. Residential Blanket Deposit
Blanket deposits will be accepted from residential customers with an average of ten or more active, long term accounts – open simultaneously. Long term defined as active for a minimum of two complete billing periods. Deposits will be held on a master account, thereby eliminating the need to place a deposit for each individual service address.

The initial calculation of the blanket deposit will be based on credit history and number of accounts provided. Blanket deposits may be evaluated and recalculated as necessary based on the number of active accounts and/or credit history.

EFFECTIVE: April 1, 2014

RATES, CHARGES AND FEES

CUSTOMER DEPOSIT (Cont.)

Blanket deposit payments may be made by cash, check, money order, or a credit card payment of up to \$1,000 or by a surety bond for the full amount required, or by an irrevocable letter of credit satisfactory to the Utilities Commission for the full amount required. The customer will need to pay the blanket deposit immediately at the time a blanket deposit is being requested. (Note – Only individual account residential deposits will be billed with a 10-day allowance for payment).

In the event the deposit is paid by surety bond or an irrevocable letter of credit, and the instrument matures, the Utilities Commission reserves the right to request cash (legal tender) for the required deposit. Failure to comply with this requirement will result in discontinuance of service.

General Service (Commercial) Accounts

- A. The customer will need to pay the full deposit at the time the account is being established.
- B. Deposit payments must be made by cash, check, or money order. Credit cards will be accepted up to \$1,000.
- C. When the required combined total deposit exceeds \$1,000, the applicant, at their option, may furnish in lieu of cash the following instruments:
 - 1. A surety bond for the full amount required;
 - OR
 - 2. An irrevocable letter of credit satisfactory to the Utilities Commission for the full amount required.

In the event the above instruments mature, the Utilities Commission reserves the right to request cash (legal tender) for the required deposit. Failure to comply with this requirement will result in discontinuance of service.

- 3. For new accounts, the Utilities Commission will initiate a review of customer's monthly billings as compared to the deposit paid, not less than six months but not more than one year from the service date.

EFFECTIVE: April 1, 2014

IV. ADDITIONAL DEPOSITS

In the event the utility service is discontinued for non-payment or has received two (2) or more returned checks within a twelve (12) month period, the Utilities Commission may require a deposit(s) sufficient to cover at least two (2) months of the previous average monthly billing to be paid within ten (10) days from notice. If such additional deposit is not made within ten (10) days, the Utilities Commission may disconnect service in accordance with the collection and disconnect policy. On a case by case basis, an extended due date for additional deposits may be considered.

V. INTEREST ON CUSTOMER POLICY

Interest rate to be determined by the Utilities Commission each year and will be credited to the customer's account each month beginning with the first full month of service.

VI. REFUNDS OF DEPOSITS

For residential accounts only, the Utilities Commission will promptly and automatically credit the deposit to the customer's account after adoption date of the policy when:

1. The customer had paid bills for the previous twenty-four (24) consecutive residential billings without having service disconnected for non-payment;
- AND
2. Without having more than two (2) occasions on which a bill was delinquent for the previous twenty-four (24) months;
- AND
1. When a customer has not had any returned checks within a twenty-four (24) month period (excludes verified bank errors).

The deposits are refundable only to the customer whose name appears thereon.

VII. RECORDS OF DEPOSIT

- A. The Utilities Commission will keep records to show:
1. Name, address and Social Security number of each depositor.
 2. Amount and date of deposit.
 3. Each transaction concerning deposit.
- B. The Utilities Commission will issue a receipt of deposit to each applicant from whom a deposit is received and provide a means whereby a depositor may establish claim if the receipt is lost.
- C. A record of each unclaimed deposit will be maintained and the Utilities Commission will make a reasonable effort to return the deposit.

VIII. OTHER CHARGES

Late Charges

Utility accounts that have a past due balance of less than \$25.00 will not be assessed a late charge.

Accounts with a past due balance greater than \$25.00 will be charged \$5.00 or 1.5%, whichever is greater.

Returned Checks

If the customer pays the returned check before the check is actually received from the bank, the fee is \$20.00.

If the check has already been received from the bank, the fee is \$35.00.

RATES, CHARGES AND FEES

SERVICE FEES SCHEDULE (Cont.)

<u>SERVICE</u>	<u>FEES</u>
Reconnection Fee After Disconnection for Non-Payment, Regular Working Hours	\$ 50.00
Reconnection Fee After Unauthorized (Illegal) Connection* (*Minimum or Actual Cost of Investigation)	\$150.00
Reconnection at Pole	\$150.00
Meter Reset Charge After Unauthorized (Illegal) Connection (Same as Supplemental Meter)	\$150.00
<u>TAMPERING FEES**</u>	
Cut Seal or Cut Lock Fee	\$ 35.00
Damaged Equipment	\$ 75.00
Meter Tampering / Unauthorized Use (Illegal) Fee*** - 1 st Offense (***Minimum Plus Any Applicable Service Charges)	\$300.00
Meter Tampering / Unauthorized Use (Illegal) Fee*** - Repeat Occurrence (**Minimum Plus Any Applicable Service Charges)	\$500.00
Fire Hydrant Use / Unauthorized Use (Illegal) Fee*** (***Minimum Plus Any Applicable Service Charges)	\$300.00

**Utility Tampering / Unauthorized Use (Illegal) Fees and/or the Unauthorized Use of Fire Hydrant to be assessed whenever there is evidence of meter tampering, meter bypassing, self-restored services, or unauthorized use of fire hydrants, in addition to the cost of investigation, repairs, the estimated usage, and any other service charges which may be applicable, up to and including three times the estimated dollar value of services obtained unlawfully.

Trip Fees: Any time a utility employee is deployed (other than routine meter readings or maintenance) to a customer's premise, whether for the process of disconnection (hang tag or disconnect) or other service, the customer will bear the expense. Payment in the field does not negate this fee. If a customer requests a meter be checked for accuracy, and said meter is determined to be functioning accurately, the customer will bear the expense of the trip fee. Residential energy audits are exempt from trip fees. Other examples for which the customer will bear the expense for trip fees are: requests for checking load management devices if functioning properly and sewer back-ups if determined customer's responsibility and/or due to customer's use.

Trip Fees During Regular Working Hours	\$ 35.00
Trip Fees After Hours – Emergency Only* (*Determined by the U.C.)	\$150.00

EFFECTIVE: January 24, 2012

SERVICE FEES SCHEDULE (Cont.)

<u>Service</u>	<u>Fees</u>
<u>Research Fee:</u> Per Each Request for Determination of Existing U.C. Liens, Assessments and/or Promissory Notes	\$ 20.00
<u>Collections Processing Fee:</u> Customer's Utility Account Sent to Collections for Non-Payment – Fee is Per Account	\$ 35.00
<u>2" Temporary Construction Meter – Equipment Fee:</u> (*Portion Refundable Upon Return of Equipment)	\$750.00*

The customer will pay the equipment fee upon receipt of the 2" temporary/portable meter. Upon return of the meter in good working condition, the customer will receive a refund of the lesser of \$600 or this amount reduced by replacement cost of the damaged meter and/or other components, and reduced by the payment of final bill for usage. All temporary/portable meters must be read or usage reported monthly, and will be charged a standard non-residential (commercial) water rate based on the meter size plus a non-prorated \$35 monthly processing fee. It is the responsibility of the customer to notify, and upon U.C. request, the location(s) of this meter.

<u>2" Temporary Construction Meter Wrench Fee:</u> (**Refundable upon Return of Equipment)	\$30.00**
---	-----------

<u>Wastewater Credit Request:</u>	\$35.00
-----------------------------------	---------

A customer may request a credit for the usage portion of their wastewater charges to fill or refill a swimming pool; installation of new landscaping or sod; or plumbing leak that caused excessive usage. The customer must request the credit in writing (on U.C. form) within 30 days of occurrence and must provide documentation*** to substantiate request. (***)U.C. retains right to determine acceptable documentation.) There is a limit of one credit adjustment per location per type each calendar year.

<u>Potable Water / Irrigation Credit Request:</u>	\$35.00
---	---------

A customer may request a credit for the usage portion of their potable water / irrigation charges if there is appropriate proof that a system leak and subsequent repairs occurred on the customer's side of the system. The customer must request the credit in writing (on U.C. form) within 6 months of occurrence and must provide documentation*** to substantiate request. (***)U.C. retains right to determine acceptable documentation.) There is a limit of one credit adjustment per location per type each calendar year. If credit request is for potable water and wastewater combined, only one credit request fee will be charged.

EFFECTIVE: January 24, 2012
