Addendum No. 1

March 8, 2018

RE: ITB 11-18 Disposal of Bio Solids ADDENDUM **No. 1**

To prospective vendors:

The Utilities Commission is issuing the following addendum. **As such it becomes an integral part of the proposal and must be acknowledged by the return of this signed form, with your proposal form, acknowledging receipt of the addendum.**

The following questions have been asked and are answered below:

- 1) Who is the current contractor for this service and what is their price to the Commission?
Synagro LLC Cost=\$.139/gal
- 2) Under the Scope of Work, it is stated that the Commission intends to re-bid these services once the bio-solids upgrade is complete. Would the Commission end the contract prior to the end of the first year?
The new biosolids handling would not be in operation before the end of the first year.
- 3) Under the Scope of Work, it is stated that the plant is equipped with a filling station and equipment to fill tankers. The approved contractor does not need to furnish any pumps?
No.
- 4) For the above referenced project, please advise if the material in question meets or will ever meet Class B standards.
Our plant is designed to produce Class B, lime stabilized biosolids. Previous contractors did not want it limed, so we no longer lime stabilize. A significantly lower price would justify resuming lime treatment costs and reporting.
