SANITARY SEWER REHABILITATION – SYSTEMS 1, 2 & 10

DATE: March 13, 2018

RE: Bid No. 01-18 **ADDENDUM NO. 01**

The Utilities Commission is issuing the following addendum. **As such it becomes an integral part of the proposal and must be acknowledged by the return of this signed form, with your proposal form, acknowledging receipt of the addendum.**

Bidders shall note the following statements when preparing bids for evaluation:

- Bid Document Pages 39 and 40 have been revised and are attached. Revisions are depicted in red.
- The Gravity Sanitary Sewer in Location 8 occupies FEC, FDOT and City ROWs.
- The **COMMISSION** has edited the Allowances for open cut point repair.
- 120 calendar days remains as the project duration for lining work. For the purposes of this bid, the Contractor has the ability to choose the Notice To Proceed date.
- The **COMMISSION** will not require a Pre or Post Surface Video; however, it will be the Contractor's responsibility to restore any asphalt, sidewalk, sod, landscape, etc. that is damaged during construction.
- The **COMMISSION** has not confirmed all pipe material or the condition of all manholes. It is the Contractor's responsibility to confirm during pre-video inspection.
- The Linear Footage and Vertical Feet quantities are estimated. It is the Contractor's responsibility to supply supporting documents to the **COMMISSION** for all quantities per each pay application.
- This scope of work falls under maintenance; therefore, Right-Of-Way Permits are not required.

UTILITIES COMMISSION

NEW SMYRNA BEACH, FL 32170-010

ITB# 01-18
SANITARY SEWER REHABILITATION – SYSTEMS 1, 2 & 10

- For all work, a Maintenance of Traffic Plan is required and must be presented to each agency for approval prior to work in each ROW. The **COMMISSION** will require a minimum 7 day notice for all detour and/or lane closures.
 - **FEC RIGHT-OF-WAY** - A FEC Flagger may be required. The Bid Tabulation has been revised to include an FEC Flagger Allowance should one be required.
 - **FDOT RIGHT-OF-WAY** - State Road 44 from Peninsula Ave. (Mile 30.448) to Saxon Dr. (Mile 30.813) has lane closure restrictions from 9am to 6pm. Road closures are not allowed.
 - **COUNTY RIGHT-OF-WAY** - Lane closures are allowed. Road closures are not allowed.
 - **CITY RIGHT-OF-WAY** - Lane closures are allowed. Road closures require City Commission approval.

BIDDER questions are in black. **COMMISSION** responses are in blue.

1. Can we bid just the manhole lining portion of this bid as we do not do pipe lining?
No. The **COMMISSION** desires this project to be completed at one time with one Contract. A team of Contractors, under One Prime Contractor, may submit a bid for the proposed scope of work. In order for a **BIDDER** to have their bid evaluated, all unit prices shall be included in the Total Bid Cost.
2. Can you clarify that the CIPP scope of work contained in the “5-years of similar services” requirement refers to CIPP lining that was self-performed?
The **COMMISSION** is aware that not all Prime Contractors perform CIPP and/or Manhole Lining work. Therefore, a Prime Contractor shall team with a Lining Sub-Contractor with the adequate experience. The Prime Contractor or the Sub-Contractor performing the work shall have 5 years of similar experience.

3. Will the city consider additional CIPP lining experience requirements? Traditionally, in bids that involve CIPP lining, especially involving medium diameter pipe sizes, there are specific experience requirements set forth (i.e. minimum linear footages) to ensure only qualified lining contractors are bidding. The experience requirements currently included allow for minimal, almost no self-performed CIPP experience.

The experience requirements in the Bid Document stand as is.

4. Please confirm the warranty for the manhole coating is to be 10 years.

On Page 29 under Bid Submittal Requirements in the Bid Document, Tab #7 requires all product warranty to be 10 years.

5. Please confirm that the pricing for the manhole coatings should be all inclusive and cover items such as removal of existing coatings, crack/leak repair and bench repair?

The Line Manhole unit cost shall include all labor, materials and equipment necessary for sanitary sewer manhole lining, to include but not limited to, cleaning, surface preparation/grout repair, crack/leak repair and final coat/liner on walls, channels and benches. The Bid Tabulation has been revised to reflect a \$10,000.00 project contingency that may be used for removing old manhole liners.
