Q: we need to get the single phase pad secondary voltage verified. Do they want 240/120 which is 3 low voltage bushings or 120/240 which is 4 low voltage bushings and less common A: Our single phase pad mounts have 2 secondary bushings @ 120- volts per bushing 240 volts across and a neutral bushing.

Q: please confirm item 6 is a dual voltage unit. Scope of work list has it as dual voltage while the spec itself lists a single voltage rating. Just want to be sure we quote correctly. A: Switching transformer can be 13200/22860 – we do not need dual voltage at 7620 for these units.
