RE: Bid No. 24-19 ADDENDUM NO. 01

To prospective vendors:

The Utilities Commission is issuing the following addendum. As such it becomes an integral part of the proposal and must be acknowledged by the return of this signed form, with your proposal form, acknowledging receipt of the addendum.

Bidders shall note the following statements when preparing bids for evaluation:

1. Could you please let me know what is the estimated budget for the referenced solicitation? The engineer’s estimate for the project is $87,500.00.

2. Is it possible for you to find out who manufactured the existing metal buildings on site? The manufacturer of the existing metal building is Vulcan Steel Structures, 500 Vulcan Pkwy, Adel, GA.

3. Metal building manufacturer needs to know the distributing of the 60,000 lbs of material. Is this a uniformed distributed load or a point load? Without the nature of loading he cannot calculate pad requirements. The concrete pad should be designed for a 60,000 LBS uniformly distributed load.

4. Will we need to supply a certified Survey when finished? Section 01700 of the ITB, Project Closeout, discusses the record document submittal procedures associated with this project. A certified Surveyor will be required to provide record drawings that show the actual installation where the installation varies from the work as originally shown on the contract plans. Building corners and finish floor elevation should be noted.

5. Will the building need to connect to Asphalt driveway with a smooth transition? Will it be concrete or asphalt? The plans do not show provisions for a driveway. For the purposes of bidding, do not include a connection to the existing asphalt driveway.
6. Where should we expect to pull power from, for the new building and during the project? The plans show no provisions for power for the new building. The contractor shall provide their own generator for any power needed for construction.

7. Any electrical plan? For light spacing and receptacles. There is no electrical plan. There are no lights or receptacles included in this project.

PLEASE SEE ATTACHED SHEET 7 SHOWING REVISED WEIGHT REQUIREMENTS FOR CONCRETE PAD

*A Copy of This Signed Form Must Accompany Your Bid Response*
